The Audio Expert is a comprehensive reference that covers all aspects of audio, with many practical, as well as theoretical, explanations. Providing in-depth descriptions of how audio really works, using common sense plain-English explanations and mechanical analogies with minimal math, the book is written for people who want to understand audio at the deepest, most technical level, without needing an engineering degree. It's presented in an easy-to-read, conversational tone, and includes more than 400 figures and photos augmenting the text. The Audio Expert takes the intermediate to advanced recording engineer or audiophile and makes you an expert. The book goes far beyond merely explaining how audio "works." It brings together the concepts of audio, aural perception, musical instrument physics, acoustics, and basic electronics, showing how they're intimately related. Describing in great detail many of the practices and techniques used by recording and mixing engineers, the topics include video production and computers. Rather than merely showing how to use audio devices such as equalizers and compressors, Ethan Winer explains how they work internally, and how they are spec'd and tested. Most explanations are platform-agnostic, applying equally to Windows and Mac operating systems, and to most software and hardware. TheAudioExpertbook.com, the companion website, has audio and video examples to better present complex topics such as vibration and resonance. There are also videos demonstrating editing techniques and audio processing, as well as interviews with skilled musicians demonstrating their instruments and playing techniques.

into an alcoholic, sexual and spiritual nightmare. It is the original and the greatest outback horror story. Bundanyabba and its citizens will forever haunt its readers. This edition includes an introduction by Peter Temple and an afterword by David Stratton. Wake in Fright was made into a film in 1971, arguably the greatest film ever made in Australia. It starred Donald Pleasence, Chips Rafferty, and Jack Thompson in his first screen role. Lost for many years, the restored film was re-released to acclaim in 2009. Kenneth Cook was born in Sydney in 1929. Wake in Fright was published in 1961 to high praise in New York and London, and launched Cook's writing career. Cook wrote twenty-one books in all, along with screenplays and scripts for radio and TV. Peter Temple is one of Australia's finest writers. His novel Truth won the 2010 Miles Franklin Award and the Victorian Premier's Literary Award. Temple has written nine novels and has been published in more than twenty countries. David Stratton is co-presenter of At the Movies on ABC television and film critic for the Australian. He has also served as a President of the International Critics Jury for the Cannes and Venice Film Festivals, written three books and is currently lecturing in Film History at the University of Sydney. textclassics.com.au 'It might be fifty years since the novel appeared yet it retains its freshness, its narrative still compels, and its bleak vision still disquiets...Cook can make us feel the heat, see the endless horizon, hear the sad singing on a little train as it traverses the monotonous plain.' Peter Temple, from the Introduction 'Wake in Fright deserves its status as a modern classic. Cook's prose is masterful and the story is gripping from the first page to the last.' M. J. Hyland 'A classic novel which became a classic film. The Outback without the sentimental bulldust. Australia without the sugar coating.' Robert Drewe 'Wake in Fright is a classic of the ugly side of Menzies' Australia, its brutality, its drunkenness, its anxiety to crush all sensibility. All of this is harrowingly re-recorded - the destruction of a young soul fresh to Australia - in Kenneth Cook's remarkable novel.' Thomas Keneally 'A true dark classic of Australian literature.' J. M. Coetzee '...a kind of outback Lord of the Flies...Written entirely from Grant's point of view, the prose is at first straightforward, the landscape and its people evoked simply and vividly. But later, as Grant descends into his own personal hell and finally to the depths of despair, the writing takes on the quality of a delirious

The inside story of New Zealand's iconic independent record label by the man who made it happen. I wanted to be more than just an observer. I wanted to be a part of what was going on. I had told someone and the word was out, and now I had to actually do this thing. Start a record label. I must have been drunk. Roger Shepherd was working in a Christchurch record shop when he realised the local bands he loved needed someone to make their records. Flying Nun was born. Those records and the bands that created them – The Chills, The Clean, Chris Knox and the Tall Dwarfs, The Verlaines, Sneaky Feelings, The Bats, Straitjacket Fits and many more – went on to define an era and create what became known as “ the Dunedin Sound ” . In truth it was less a unified sound than a spirit of adventure and independence that characterised the Flying Nun ethos. In this long-awaited memoir, label founder Roger Shepherd describes the idealism and passion that drove the project in the first place, the hard realities of the music industry, and the constant tension between art and commerce. Filled with revealing anecdote and insight, this is the definitive insider history of the one of the most innovative and original record labels of the modern era. "Surely the label with the highest quality output per capita in pop history." – Guardian UK. "Something inexplicably special happened in the Southern Hemisphere a quarter of a century or so ago, the ripples still rumbling, and without it, all the music you love today would sound ever so slightly, and indefinably, different. ” - British comedian Stewart Lee.

When the videocassette recorder was launched on the consumer market in the mid-1970s, it transformed home entertainment. Bringing together complementary but also competing interests from the consumer electronics industry and the film, television and other copyright industries, video created a new sector of media business. Two decades later, DVD reinvented video media for the digital age. DVD provided consumers with an innovative form of entertainment technology and almost instantaneously became the catalyst for a huge boom in the video market. Although the VCR and DVD created major markets for video hardware and software, the video business has been continually shaped by industry conflicts and tensions. Repeatedly the video market has become divided when faced with the introduction of competing formats. Easy reproduction of films and other works on cassette or disc made video software a lucrative market for the copyright industries but also intensified struggles to combat the effects of commercial piracy. 'Video and DVD Industries' examines the business of video entertainment and provides the first study looking at DVD from an industrial perspective. Detailing divisions in the video

business, the book outlines industry battles over incompatible formats, from the Betamax/VHS war, to competing laserdisc systems, alternatives such as video compact disc or Digital Video Express, and the introduction of HDDVD and Blu-ray high-definition systems. Chapters also look at the formation of international markets in the globalization of video media, the contradictory responses of the Hollywood studios to video and DVD, and the legal and technological measures taken to control industrialized video piracy.
