An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or

cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids

---

in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ’ s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You ’ ll be laughing and learning at the same time.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S.

seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime

Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference

handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant

We are talking about the Ketogenic diet, a lifestyle that will mesmerize you and that will make you a new person in no time. So, let's sit back, relax and find out

---

more about the Ketogenic diet. A keto diet is a low carb one. This is the first and one of the most important things you should know. During such a diet, your body makes ketones in your liver and these are used as energy. Your body will produce less insulin and glucose and a state of ketosis is induced.

Ketosis is a natural process that appears when our food intake is lower than usual. The body will soon adapt to this state and therefore you will be able to lose weight in no time but you will also become healthier and your physical and mental performances will improve. Your blood sugar levels will improve and you

won't be predisposed to diabetes. Also, epilepsy and heart diseases can be prevented if you are on a Ketogenic diet. Your cholesterol will improve and you will feel amazing in no time. How does that sound? A Ketogenic diet is simple and easy to follow as long as you follow some simple rules. You don't need to make

---

huge changes but there are some things you should know. So, here goes! If you've made this choice already, then, it's time you checked our amazing keto recipe collection.
