I have always been partial to Sony electronics. I purchased a Sony Cybershot 4.1 megapixels DSC-S85 digital camera back in 2001. This camera turned out to be a gem. The quality of the pictures is pretty awesome,

although back then the cameras were still pretty bulky.

The Sony Cyber-shot DSC-W70 is an excellent, very compact performer. The 7.2 megapixel sensor, 3x optical zoom, nice 2.5 inch LCD, and "Stamina" battery life produces good images and excellent battery life. About the size of a deck of cards, it's easily pocketable and still performs well indoors.
