Innovative Data Communication Technologies and Application Butterworth-Heinemann

Digital forensics and multimedia forensics are rapidly growing disciplines whereby electronic information is extracted and interpreted for use in a court of law. These two fields are finding increasing importance in law enforcement and the investigation of cybercrime as the ubiquity of personal computing and the internet becomes ever-more apparent. Digital forensics involves investigating computer systems and digital artefacts in general, while multimedia forensics is a sub-topic of digital forensics focusing on evidence extracted from both normal computer systems and special multimedia devices, such as digital cameras. This book focuses on the interface between digital forensics and multimedia forensics, bringing two closely related fields of forensic expertise together to identify and understand the current state-of-the-art in digital forensic investigation. Both fields are expertly attended to by contributions from researchers and forensic practitioners specializing in diverse topics such as forensic authentication, forensic triage, forensic photogrammetry, biometric forensics, multimedia device identification, and image forgery detection among many others. Key features: Brings digital and multimedia forensics together with contributions from academia, law enforcement, and the digital forensics industry for extensive coverage of all the major aspects of digital forensics of multimedia data and devices Provides comprehensive and authoritative coverage of digital forensics of multimedia data and devices Offers not only explanations of techniques but also real-world and simulated case studies to illustrate how digital and multimedia forensics techniques work Includes a companion website hosting continually updated supplementary materials ranging from extended and updated coverage of standards to best practice guides, test datasets and more case studies

This is the second edition of Wil van der Aalst's seminal book on process mining, which now discusses the field also in the broader context of data science and big data approaches. It includes several additions and updates, e.g. on inductive mining techniques, the notion of alignments, a considerably expanded section on software tools and a completely new chapter of process mining in the large. It is self-contained, while at the same time covering the entire process-mining spectrum from process discovery to predictive analytics. After a general introduction to data science and process mining in Part I, Part II provides the basics of business process modeling and data mining necessary to understand the

remainder of the book. Next, Part III focuses on process discovery as the most important process mining task, while Part IV moves beyond discovering the control flow of processes, highlighting conformance checking, and organizational and time perspectives. Part V offers a guide to successfully applying process mining in practice, including an introduction to the widely used open-source tool ProM and several commercial products. Lastly, Part VI takes a step back, reflecting on the material presented and the key open challenges. Overall, this book provides a comprehensive overview of the state of the art in process mining. It is intended for business process analysts, business consultants, process managers, graduate students, and BPM researchers.

The growth in popularity and complexity of video games has spurred new interest in how games are developed and in the research and technology behind them. David Heineman brings together some of the most iconic, influential, and interesting voices from across the gaming industry and asks them to weigh in on the past, present, and future of video games. Among them are legendary game designers Nolan Bushnell (Pong) and Eugene Jarvis (Defender), who talk about their history of innovations from the earliest days of the video game industry through to the present; contemporary trailblazers Kellee Santiago (Journey) and Casey Hudson (Mass Effect), who discuss contemporary relationships between those who create games and those who play them; and scholars Ian Bogost (How to Do Things With Videogames) and Edward Castronova (Exodus to the Virtual World), who discuss how to research and write about games in ways that engage a range of audiences. These experts and others offer fascinating perspectives on video games, game studies, gaming culture, and the game industry more broadly.

This volume presents the essence of the work of the great French photographer Eugène Atget through one hundred carefully selected photographs. Atget devoted more than thirty years of his life to the task of documenting the city of Paris and the surrounding countryside, and in the process created an oeuvre that brilliantly explains the great richness, complexity, and authentic character of his native culture. John Szarkowski, an acknowledged master of the art of looking at photographs, explores the unique sensibilities that made Atget one of the greatest artists of the twentieth century and a vital influence on the development of modern and contemporary photography. The eloquent introductory text and commentaries on Atget's photographs form an extended essay on the remarkable visual intelligence displayed in these subtle, sometimes enigmatic pictures.

Since the beginning of human civilization, plants have been our true companions. Plants contribute not only to our existence but also serve us through discovery, design and the treatment of various diseases where there is no satisfactory cure in modern medicine. This has focused Natural Product Chemists to unravel plants therapeutic potential in the light of modern analytical and pharmacological understandings. Presence of multiple active phytochemicals in medicinal plants offers exciting opportunity for the development of novel therapeutics, providing scientific justification for their use in traditional medicines. Non-food plants have been recognized as biofactories for the production of eco-friendly value added materials including agricultural, food products, enzymes, nutraceuticals etc. They have also been widely explored for personal care, industrial products and sources of energy generation. The proven efficacy of botanicals has been appreciated by the scientific community and strengthened plant-human relationship. The synergism in the Phytoproducts, the result of the interaction of two or more moieties, is not simply additive but multiplicative. Recent acceptance of the Food and Drug Administration (US) for herbal-medicine based preparation has renewed interest in Natural Product Research. The year 2011 is declared as the International Year of Chemistry (IYC 2011) by the United Nations Assembly. On this occasion, the present conference CPHEE 2011 aims to offer chemists from diverse areas to come to a common platform to share the knowledge and unveil the chemistry and magic potentials of phytoproducts for the mankind.

It's Not About the F-Stop Simon and Schuster

The simplest "introduction to plant-based eating" cookbook with an approachable yet crave-worthy take on health-conscious cuisine. Two (former) competitive bodybuilders turned crunchy hippie mamas have joined forces to share health-forward recipes from their daily lifestyles. Amber, a 4X cover fitness model, influencer, mama and entrepreneur, and Brittany, wellness blogger, writer, mama and author, have learned over the years how to prepare healthy, plant-heavy meals for their families-- without sacrificing flavor. After winning over picky husbands, toddlers and friends alike, they were convinced to create a cookbook to help you fool your family and friends into healthier, plant-heavy eating, too! These recipes are for everyone! Hipie Eats caters to those with food allergies, sensitivities and dietary restrictions by being gluten-free, dairy-free, peanut-free, fish-free, shellfish-free, soy-free and vegan-friendly. Although the great majority of the recipes are vegan, a handful of recipes are available for omnivores. All recipes that are not entirely vegan provide a simple 1:1 replacement. From sweet noms like strawberry cake donuts, simple smoothies and savory dishes, like creamy potato and kale soup, Hipie Eats will provide instant family classics. More than just a cookbook, this hippie mama duo has you covered by including a health-forward grocery list, sharing healthier swaps and nutrition tips to enhance your lifestyle for years to come. This isn't just a book of kale salads, it's a book with all the good stuff we know and love, with a healthier, hippie twist. "Everyone has a story and it all starts somewhere. This is ours. From "buff bodybuilding babes" with similar pasts of diet extremes, to finally achieving a balanced lifestyle in nutrition, health and total wellness. We believe the food we eat is more than just a meal, it's a conscious choice to nourish the body from the inside out. Because to us, health really is wealth. Eat like a hippie!" -Brittany Bacinski & Amber Fokken

PhotoWork Springer Nature

PhotoWork is a collection of interviews by forty photographers about their approach to making photographs and, more importantly, a sustained body of work. Curator and lecturer Sasha Wolf was inspired to seek out and assemble responses to these questions after hearing from countless young photographers about how they often feel adrift in their own practice, wondering if they are doing it the "right" way. The responses, from both established and newly emerging photographers, reveal there is no single path.
