The new Sony Cyber-shot DSC-RX100 IV camera is the latest in Sony's compact

---

digital releases. It has been referred to as the enhanced model to the RX100 III. As with this earlier RX100 III model and others, the RX100 IV boasts critical acclaim and epitomizes Sony's quest at innovation. The DSC-RX100 IV, though similar to other models in the line, also boasts enhanced features and has received rave reviews since its release to the public. Like the earlier models, it is outfitted with a twenty-four-seventy millimeter equivalent lens (F1.8-2.8), the 2.36metre OLED pop-up electronic viewfinder and the three inch display.

This open access peer-reviewed volume was inspired by the UNESCO UNITWIN Network for

Underwater Archaeology International Workshop held at Flinders University, Adelaide, Australia in November 2016. Content is based on, but not limited to, the work presented at the workshop which was dedicated to 3D recording and interpretation for maritime archaeology. The volume consists of contributions from leading international experts as well as up-and-coming early career researchers from around the globe. The content of the book includes recording and analysis of maritime archaeology through emerging technologies, including both practical and theoretical contributions. Topics include photogrammetric recording, laser scanning, marine geophysical 3D survey techniques, virtual reality, 3D modelling and reconstruction, data integration and Geographic Information Systems. The principal incentive for this publication is the ongoing rapid shift in the methodologies of maritime

---

archaeology within recent years and and visualization.

a marked increase in the use of 3D and digital approaches. This convergence of digital technologies such as underwater photography and photogrammetry, 3D sonar, 3D virtual reality, and 3D printing has highlighted a pressing need for these new methodologies to be considered together, both in terms of defining the state-of-the-art and for consideration of future directions. As a scholarly publication, the audience for the book includes students and researchers, as well as professionals working in various aspects of archaeology, heritage management, education, museums, and public policy. It will be of special interest to those working in the field of coastal cultural resource management and underwater archaeology but will also be of broader interest to anyone interested in archaeology and to those in other disciplines who are now engaging with 3D recording
