Hollywood is facing unprecedented challenges – and is changing rapidly and radically as a result. In this major new study of the contemporary film industry, leading film historian Tino Balio explores the impact of the Internet, declining DVD sales and changing consumer spending habits on the way Hollywood conducts its business. Today, the major studios play an insignificant role in the bottom lines of their conglomerate

parents and have fled to safety, relying on big-budget tentpoles, franchises and family films to reach their target audiences.

Comprehensive, compelling and filled with engaging case studies (TimeWarner, DreamWorks SKG, Spider Man, The Lord of the Rings, IMAX, Netflix, Miramax, Sony Pictures Classics, Lionsgate and Sundance), Hollywood in the New Millennium is a must-read for all students of film studies, cinema studies, media studies, communication studies, and radio and television.

Delhi OMG! is the story of one man's struggle for survival in the colorful, yet tough Indian city of Delhi. Summary Of The Book Delhi OMG! is the story of a man named Dinesh. It is set in the big, bad city of Delhi, traversing some of the key places in the city and exposing its shocking underbelly. bribery, obsession with foreign women, sex trafficking, and the well-known fixation of Delhiites on the concept of self-image. This book presents an overview of the emerging field of emotion in videogame soundtracking. The emotional impact of

music has been well-documented, particularly when used to enhance the impact of a multimodal experience, such as combining images with audio as found in the videogames industry. Soundtracking videogames presents a unique challenge compared to traditional composition (for example film music) in that the narrative of gameplay is non-linear – Player dependent actions can change the narrative and thus the emotional characteristics required in the soundtrack. Historical approaches to emotion measurement, and the musical feature mapping and music selection that might be used in video game soundtracking are outlined, before a series of cutting edge examples are given. These examples include algorithmic composition techniques, automated emotion matching from biosensors, motion capture techniques, emotionally-targeted speech synthesis and signal processing, and automated repurposing of existing music (for example from a players own library). The book concludes with some possibilities for the future.
