The international conference on Automation and Robotics-ICAR2011 is held during December 12-13, 2011 in Dubai, UAE. The proceedings of ICAR2011 have been published by Springer Lecture Notes in Electrical Engineering, which include 163 excellent papers selected from more than 400 submitted papers. The conference is intended to bring together the researchers and engineers/technologists working in different aspects of intelligent control systems and optimization, robotics and automation, signal processing, sensors, systems modeling and control, industrial engineering, production and management. This part of proceedings includes 81 papers contributed by many researchers in relevant topic areas covered at ICAR2011 from various countries such as France, Japan, USA, Korea and China etc. Many papers introduced their advanced research work recently; some of them gave a new solution to problems in the field, with powerful evidence and detail demonstration. Others stated the application of their designed and realized systems. The session topic of this proceeding is intelligent control and robotics and automation, which includes papers about Distributed Control Systems, Intelligent Fault Detection and Identification, Machine Learning in Control, Neural Networks based Control Systems, Fuzzy Control, Genetic Algorithms, Robot Design, Human-robots Interfaces, Network Robotics, and Autonomous Systems, Industrial Networks and Automation, Modeling, Simulation and Architectures, Vision, Recognition and Reconstruction, Virtual Reality, Image Processing, and so on. All of papers here involved the authors' numerous time and energy, will be proved valuable in their research field. Sincere thanks to the committee and all the authors, moreover anonymous reviewers from many fields and organizations. That is a power for all of us to go on research work for the world.

A GoodReads Reader's Choice Bridget Jones—one of the most beloved characters in modern literature (v.g.)—is back! In Helen Fielding's wildly funny, hotly anticipated new novel, Bridget faces a few rather pressing questions: What do you do when your girlfriend's sixtieth birthday party is the same day as your boyfriend's thirtieth? Is it better to die of Botox or die of loneliness because you're so wrinkly? Is it wrong to lie about your age when online dating? Is it morally wrong to have a blow-dry when one of your children has head lice? Is it normal to be too vain to put on your reading glasses when checking your toy boy for head lice? Does the Dalai Lama actually tweet or is it his assistant? Is it normal to get fewer followers the more you tweet? Is technology now the fifth element? Or is that wood? If you put lip plumper on your hands do you get plump hands? Is sleeping with someone after two dates and six weeks of texting the same as getting married after two meetings and six months of letter writing in Jane Austen's day? Pondering these and other modern dilemmas, Bridget Jones stumbles through the challenges of loss, single motherhood, tweeting, texting, technology, and rediscovering her sexuality in—Warning! Bad, outdated phrase approaching!—middle age. In a triumphant return after fourteen years of silence, Bridget Jones: Mad About the Boy is timely, tender, touching, page-turning, witty, wise, outrageous, and bloody hilarious. Once the treasured piece of the elite class, mobile phones have now become a prerequisite of every commoner. From schoolchildren to pensioners, from bureaucrats to fruit vendors, all depend greatly on their mobile phones. The reason can be given to its impeccable potential to perform various applications efficiently, within no time. This book on Mobile Commerce gives an in-depth insight on the role of a mobile in revolutionizing various industry verticals, specifically business and commerce. The book shows the evolution of a mobile phone from a mere gadget meant for communication to a smarter one performing business transactions. The book is divided into seven parts segregated as—Basic concepts, Technology, Key players, Key products, Security of legal aspects, the Future trends and the Case studies. The book also discusses various technologically advanced handheld devices, like Smartphones, PDA's, Laptops, Tablets and Portable gaming consoles, in detail. Besides, the basic technology and concepts involved in mobile commerce is discussed comprehensively. The key concepts, like mobile marketing, mobile ticketing, mobile computing, mobile payments and mobile banking are discussed vis-a-vis latest technologies, like wireless and mobile communication technology, digital cellular technology, mobile access technology and 4G and 5G systems. The book also throws light on the issues, such as mobile security hazards,

and the necessary measures to protect the same. A chapter is devoted to laws governing the mobile phone usage and its privacy. The Case Studies are provided elucidating the role of mobile commerce in the real-life scenarios. This book is intended for the undergraduate and postgraduate students of Communication Engineering, Information Technology and Management.

Pro JavaFXTM Platform Taylor & Francis
Tetsu Natsume of Sony Computer Science Labs (Sony CSL) has been pioneering technology promotion for a decade. As he seeks marketplace opportunities for ground-breaking research, he plays the role of a Technology Producer -- a role that will be increasingly important as organizations seek optimally efficient and effective applications of basic research. Natsume's task has been greatly facilitated by his association with Sony CSL, a research lab founded by co-author Mario Tokoro. While CSL is owned by SONY, it nevertheless operates almost entirely independently. At CSL, a diverse, cosmopolitan group of talented researchers are free to explore any idea that might one day change the world. Natsume's task is to optimise that process by identifying the best path to the market for the new insights that pour out of CSL. Functioning somewhat like a movie producer, Natsume has blazed a trail for technology promoters the world over. He explains his techniques for overcoming challenges and embracing opportunities. His "10 core principles of technology promotion", which offer the reader an especially valuable framework for moving between the very different worlds of the lab and the marketplace, cover the importance of appropriate timing, speed, commitment and mindset, while being rigorously simple and boldly ambitious. This book is an eye-opening primer for anyone interested in realising and optimising the commercial value of basic research.

Michael Freeman has a well-deserved reputation for effectively explaining the concepts behind digital picture-taking to a variety of audiences. Here, he turns his attention to the professionals and advanced hobbyists who are making the move from traditional to digital and want help mastering the technology and meeting their clients' new requirements. Freeman thoroughly answers the most frequently asked questions about the basics of digital capture, from cameras and computers to storage options, printers, and scanners. Photographers will learn the different file formats and how to save images for print or publishing on the web. They'll explore valuable software tools and basic image processing programs that fix common problems, and see how to improve pictures using an assortment of cropping and filtering techniques. The smart, detailed advice will give photographers confidence as they enter

this new digital world.

Building Websites with HTML5 to Work with Mobile Phones ???

The JavaFXTM technology and platform is essentially Sun's response to Adobe Flash and Microsoft's Silverlight. JavaFX lets developers play with the open-source scripting, desktop, and mobile APIs offered to create dynamic, seamless visual user interfaces (UIs) that are "Flash–like" and beyond... Learn from bestselling JavaFX author Jim Weaver and expert JavaFX developers Weiqi Gao, Stephen Chin, and Dean Iverson to discover the JavaFX technology and platform that enables developers and designers to create rich Internet applications (RIAs) that can run across diverse devices. Covering the JavaFX Script language, JavaFX Mobile, and development tools, Pro JavaFXTM Platform: Script, Desktop and Mobile RIA with JavaTM Technology is the first book that fully provides JavaFX version 1.2 code examples that cover virtually every language and API feature. This book contains the following: Tutorials that teach JavaFX 1.2 to an application developer or graphics designer who has had no exposure to JavaFX. These tutorials will be exhaustive, covering virtually every facet of JavaFX Script and are fully updated for the JavaFX 1.2 release. Reference materials on JavaFX 1.2 that augment what is available from the JavaFX 1.2 Language Reference and API documentation. How to take JavaFX 1.2 to other platforms besides the desktop, such as mobile. Visit projavafx.com for more resources and information from the authors.

Discover what is involved in designing the world's most popular and advanced consumer product to date - the phone in your pocket. With this essential guide you will learn how the dynamics of the market, and the pace of technology innovation, constantly create new opportunities which design teams utilize to develop new products that delight and surprise us. Explore core technology building blocks, such as chipsets and software components, and see how these components are built together through the design lifecycle to create unique handset designs. Learn key design principles to reduce design time and cost, and best practice guidelines to maximize opportunities to create a successful product. A range of real-world case studies are included to illustrate key insights. Finally, emerging trends in the handset industry are identified, and the global impact those trends could have on future devices is discussed.

Building games for the Windows Phone and other mobile devices Taylor & Francis Did you know you can take your Flash skills beyond the browser, allowing you to make apps for Android, iOS and the BlackBerry Tablet OS? Build dynamic apps today starting with the easy-to-use Android smartphones and tablets. Then, take your app to other platforms without writing native code. Pro Android Flash is the definitive guide to building Flash and other rich Internet applications (RIAs) on the Android platform. It covers the most popular RIA frameworks for Android developers—Flash and Flex—and shows how to build rich, immersive user experiences on both Android smartphones and tablets. You'll learn how to incorporate multimedia, animation, and special effects into your apps for maximum visual appeal. You'll also cover advanced topics, including input methods, hardware inputs, deployment, and performance optimization.

Since the first EcoDesign International Symposium held in 1999, this symposium has led the research and practices of environmentally conscious design of products, services, manufacturing systems, supply chain, consumption, as well as economics and society. EcoDesign 2011 - the 7th International Symposium on Environmentally Conscious Design and Inverse Manufacturing - was successfully held in the Japanese old capital city of Kyoto, on November 30th – December 2nd, 2011. The subtitle of EcoDesign 2011 is to "design for value innovation towards sustainable society." During this event, presenters discussed the way to achieve

both drastic environmental consciousness and value innovation in order to realise a sustainable society.
