Rockport Pub Knowledge Management and Knowledge Engineering is a fascinating field of research these days. In the beginning of EKAW, the modeling and acquisition of knowledge was the privilege of — or rather a burden for — a few knowledge engineers familiar with knowledge engineering paradigms and knowledge representation formalisms. While the aim has always been to model knowledge declaratively and allow for reusability, the knowledge models produced in these early days were typically used in single and very specific applications and rarely changed. Moreover, these models were typically

rather complex, and they could be understood only by a few expert knowledge engineers. This situation has changed radically in the last few years as clearly indicated by the following trends: — The creation of (even formal) knowledge is now becoming more and more collaborative. Collaborative ontology engineering tools and social software platforms show the potential to leverage the wisdom of the crowds (or at least of “the many”) to lead to broader consensus and thus produce shared models which qualify better for reuse. — A trend can also be observed towards developing and publishing small but 2 3 4 high-impact vocabularies (e.g., FOAF, DublinCore, GoodRelations) rather than complex and large knowledge models.

El actual capitalismo, definido como capitalismo financiero, es paralelamente capitalismo reputacional. Un mundo virtual lleno de signos y productos de futuro más que de realidades y presente en el cual todo es cuestión de fiabilidad, credibilidad, crédito y confianza. Agentes públicos y corporaciones de todo tipo han tenido que "fabricarse un alma" que las hiciese reconocibles y creíbles, una marca y demás activos inmateriales e intangibles que en ese entorno se mueven. La gestión y manejo de esos intangibles ha entrado de lleno en las estrategias de los negocios y de la política desde la década de 1980. Se trata de activos reconocidos y presentes en cuentas de resultados, en objetivos, en balances y en beneficios, englobados en torno al término "reputación". La "reputación" responde al definitivo redescubrimiento del "cliente" como entidad final objeto de cualquier actividad e iniciativa pública y de mercado, al focalizar toda la actividad de las instituciones y empresas desde el cliente final. La "reputación" es la respuesta, el retorno, que el individuo, el grupo, el mercado, la opinión, dan como interlocutores a la posición de una

corporación en la sociedad. De esto trata este ensayo, de cómo se ha sistematizado el capitalismo reputacional, de cómo se han creado, organizado y gestionado los activos inmateriales, de cómo la comunicación, sus medios y herramientas son el sistema que soporta reputación e intangibles, de cómo la comunicación y los intangibles han evolucionado hasta posicionarse en el corazón mismo de las organizaciones y de los negocios, constituyéndose, junto con las finanzas, en componente esencial de la época que estamos viviendo y en uno de los fundamentos del mundo del inmediato futuro.
