Videotape Editing and Post-Production emphasizes the basic information that professionals need to acquire a practical, working knowledge of editing equipment and the post-production process. This book is a "real world" guide to both the technical and non-technical aspects of videotape production. The text and numerous illustrations bring the reader up-to-date on the latest developments in video, including component video signal, field rate SMPTE time code, Betacam SP (TM), VHS HiFi, the videotape editing bay, control edit list cleaning, and multi format editing. Anderson also provides timely information on the latest film to video offline systems, track editing, time-code editing, offline editing, digital video effects systems, electronic animation and graphics systems, and personal computers that function as edit controllers and edit list management tools. Combining basic information on editing equipment and techniques with tips on budgeting, organization, and getting into video editing, this is a valuable reference tool for experienced and novice editing professionals. * Practical, hands-on approach * Provides novices with basic information on equipment and techniques * Offers professionals guidance on the management of the process

Tallinn Manual 2.0 expands on the highly influential first edition by extending its coverage of the international law governing cyber operations to peacetime legal regimes. The product of a three-year follow-on project by a new group of twenty renowned international law experts, it addresses such topics as sovereignty, state responsibility, human rights, and the law of air, space, and the sea. Tallinn Manual 2.0 identifies 154 'black letter' rules governing cyber operations and provides extensive commentary on each rule. Although Tallinn Manual 2.0 represents the views of the experts in their personal capacity, the project benefitted from the unofficial input of many states and over fifty peer reviewers.
