Stolen Treasure is a book almost 70 years in the writing! Written over the decades since 1946, this collection of observations, quotes, proverbs, witticisms and rules for living have guided the author since his youth growing up in India, through his time in the Indian Navy, and for the bulk of his life since moving to Ireland in 1960. Now in his mid-80s, the author presents a lifetime of humour and words of wisdom for a happy life in this book. A true treasure collection of one-line gems and snip-bits of life s experiences, the book presents an insight into the observations of life over the author s lifetime that so many of us experience but never document. At first, observations from an idealistic young man are presented. This is followed by wisdom learned in early adulthood and gathered as an Officer with the

Indian Navy. The observations continue from a happy lifetime in Ireland with a large focus on what the author learned about life as a husband and father, as well as engineer and lecturer, to retiree. These have been collected over the years as the author has experienced them in life or overheard them in social occasions, and carefully recorded by hand. In the decades before the internet and social media, these were the original status updates that tell a story of how life and perception of what matters has changed over almost 70 years. An intriguing read for every person of all ages and all interests.

The manual is divided into two parts. In the first, the pharmacologic basis for the calculation is briefly stated for each of the procedures (numbered 1 through 33). Then the appropriate equations (formulas) are given and an example of each calculation is provided. There are other actions which are commonly performed under certain

circumstances, independently of habit, and which seem to be due to imitation or some sort of sympathy. Thus persons cutting anything with a pair of scissors may be seen to move their jaws simultaneously with the blades of the scissors. Children learning to write often twist about their tongues as their fingers move, in a ridiculous fashion. When a public singer suddenly becomes a little hoarse, many of those present may be heard, as I have been assured by a gentleman on whom I can rely, to clear their throats; but here habit probably comes into play, as we clear our own throats under similar circumstances.

Curious George Takes a Train

Susan Sontag meets Hanif Abdurraqib in this fascinating exploration of the unexpected connections between how we consume images and the insidious nature of Fascism. Images come at us quickly, often without context. A photograph of Syrian children suffering in the wake of a chemical attack segues into a stranger's pristine Instagram selfie. Before we can react to either, a new meme induces a laugh and a share. While such constant give and take might seem innocent, even entertaining, this barrage of content numbs our ability to examine critically how the world, broken down into images, affects us. Images without context isolate us, turning everything we experience into mere transactions. It is exactly this alienation

that leaves us vulnerable to fascism—a reactionary politics that is destroying not only our lives and our nations, but also the planet's very ability to sustain human civilization. Who gets to control the media we consume? Can we intervene, or at least mitigate the influence of constant content? Mixing personal anecdotes with historical and political criticism, *Image Control* explores art, social media, photography, and other visual mediums to understand how our culture and our actions are manipulated, all the while building toward the idea that if fascism emerges as aesthetics, then so too can anti-fascism. Learning how to ethically engage with the world around us is the first line of defense we have against the forces threatening to tear that world apart.
