The Routledge International Handbook of Ethnographic Film and Video is a state-of-the-art book which encompasses the breadth and depth of the field of ethnographic film and video-based research. With more and more researchers turning to film and video as a key element of their projects, and as research video production becomes more practical due to technological advances as well as the growing acceptance of video in everyday life, this critical book supports young researchers looking to develop the skills necessary to produce meaningful

ethnographic films and videos, and serves as a comprehensive resource for social scientists looking to better understand and appreciate the unique ways in which film and video can serve as ways of knowing and as tools of knowledge mobilization. Comprised of 31 chapters authored by some of the world's leading experts in their respective fields, the book's contributors synthesize existing literature, introduce the historical and conceptual dimensions of the field, illustrate innovative methodologies and techniques, survey traditional and new technologies, reflect on ethics and moral imperatives, outline ways to work with people, objects, and tools, and shape the future agenda of the field. With a particular focus on making ethnographic film and video, as opposed to analyzing or critiquing it, from a variety of methodological approaches and styles, the Handbook provides both a comprehensive introduction and up-to-date survey of the field for a vast variety of audiovisual researchers, such as scholars and students in sociology, anthropology, geography, communication and media studies, education, cultural studies, film studies, visual arts, and related social science and humanities. As such, it will appeal to a multidisciplinary and international audience, and features a dynamic, forward-thinking, innovative, and contemporary focus oriented toward the very latest developments in the field, as well as future possibilities.

This book is a complete manual on the Sony Cyber-shot DSC-RX100 VI camera, one of the most advanced, but still pocketable, cameras available. With this book, author Alexander White provides users of the RX100 VI with a guide to all aspects of the camera's operation. Using a tutorial-like approach, the book shows beginning and intermediate photographers how to take still images and record video with the RX100 VI, and explains when and why to use the camera's many features. The book provides details about the camera's automatic and advanced shooting modes, including burst shooting at rates as fast as 24

frames per second, as well as its numerous menu options for shooting, playback, and setup. The book includes information about using Wi-Fi and Bluetooth connections for image transfer, remote control, and adding location information to images. The book has more than 500 color photographs or illustrations that help explain the camera's menus, shooting screens, and features. These images include examples of photographs taken using the RX100 VI's Scene mode, with settings optimized for subjects such as landscapes, sunsets, portraits, low-light, and action shots; and the Creative Style and Picture Effect menu options, with settings that alter the appearance of images. The book also provides introductions to topics such as street photography, astrophotography, and digiscoping, with photographic examples. The book includes a full discussion of the video features of the RX100 VI, which can shoot HD and 4K (ultra-HD) movies, and which offers manual control of exposure and focus during movie recording. The book explains the camera's numerous features that are useful for professional-level videography, including Picture Profiles that allow adjustment of settings such as gamma curve, black level, knee, and detail. The book provides detailed information about recording 4K video to an external video recorder using the "clean" video output from the camera's HDMI port. In three appendices, the book discusses accessories for the RX100 VI, including cases, power sources, grips, remote controls, and filter adapters, and includes a list of websites and other resources for further information. The book includes an appendix with "quick tips" on how to take advantage of the camera's features in the most efficient ways possible. This guide to the RX100 VI includes a detailed index, so the reader can quickly find needed information about any particular feature or aspect of the camera.

High end digital cinematography can truly challenge the film camera in many of the technical, artistic and emotional aspects of what we think of as 'cinematography'. This book is a guide for practising and aspiring cinematographers and DOPs to digital cinematography essentials - from how to use the cameras to the rapidly emerging world of High Definition cinematography and 24p technology. This book covers the `on-the-set' knowledge you need to know - its emphasis lies in practical application, rather than descriptions of technologies, so that in this book you will find usable `tools' and information to help you get the job done. From `getting the look' to lighting styles and ratios, what is needed for different types of shoots and the technical preparation required, this is a complete reference to the knowledge and skills required to shoot high end digital films. The book also features a guide to the Sony DVW in-camera menus - showing how to set them up and how they work - a device to save you time and frustration on set. Paul Wheeler is a renowned cinematographer/director of photography and trainer, he runs courses on Digital Cinematography at the National Film & Television School and has lectured on the Royal College of Art's MA course and at The London International Film School. He has been twice nominated by BAFTA for a Best Cinematography award and also twice been the winner of the INDIE award for Best Digital Cinematography.

Guide to 3D Photography is for the beginning 3D photographer, showing how to get started, how to process images on your computer or tablet, and how to view your 3D photographs. You can begin shooting 3D photos using one camera or two, or using integrated 3D cameras. This is a hands-on guide with step-by-step examples for shooting, processing and displaying your 3D images. This guide is intended for the novice to mid-skill level 3D enthusiast; this guide is not targeted at experienced 3D photographers. Anyone can shoot and process 3D - this book shows you how. Using free software that runs on Windows-based personal computers, or free or low-cost apps for iPad or Android tablets and smart phones, your stereo photographs can be turned into viewable 3D photos for display on your computer, displayed online or printed on paper or turned in to glasses free 3D prints (for a service fee). While 3D TVs and monitors provide the best viewing experience, you can get started with free or very low cost filtered glasses. You'll even learn how to create 3D photos that can be viewed without any glasses or special hardware. NOT RECOMMENDED for Black & White or gray scale e-readers as the 3D color photographs in the books can not be viewed - however the photos are available separately online.

RECOMMENDED FOR COLOR E-READERS including color tablets and e-reader software on tablets, notebooks and desktop computers. Guide to 3D Photography covers learning "how to see in 3D" to achieve the best 3D effects while avoiding common 3D problems that can ruin 3D photos or cause eyestrain for viewers. The book also covers methods for shooting 3D with one camera, with two cameras, or with commercially made, special purpose 3D cameras, and viewing 3D photos on 3D monitors. Advanced topics include the concept of a 3D "depth box", the importance of the spacing between the left and right image lenses and how that impacts depth captured in the photograph, advanced image processing techniques and methods of creating "wiggle" animated 3D images, as well as red/cyan, green/magenta, yellow/blue and amber/blue anaglyphs. 183 PDF pages. Over 100 photos including red/cyan anaglyph 3D, cross-eyed 3D and 2D photographs. Over 50 illustrations/drawings or screen shots.
