Here are nine solos for plectrum guitar written with the tradition of the Celtic ballad and Scottish Aire. Many of the solos call for a 7 string guitar but can certainly be played on a 6 string. I have shown alternate notes for the low 7 string pedal tones in the tablature.The solos give the guitarist an opportunity to play concert settings with a maximum of expression. I have recorded all of the solos and they are available as a free internet download.This book is a sequel to my solo collection entitled Guitar Meditations (MB22029). I have authored both solo collections to address the need for serious compositions for the plectrum guitarist wanting to play in concert or recital. the music in each collection draws from a wide variety of influences and utilizes many contemporary harmonic concepts. I hope you enjoy performing and listening to these solos.

Transmorphing Utopia is the first major publication on the astutely absurd work of artist Paul W. Wadell. This richly illustrated book includes essays by independent curator Santiago Vernetti and celebrated author Jonathan Griffin, as well as an exclusive interview between Waddell and the artist Chelsea Coon. The texts offer generous insights into the full scope and depth of Waddell's career across his varied mediums and disciplines. The full color reproductions bring together images from two seminal series of painting: LOOSE HEADS (paintings that look for you) and TRANSMORPHING. Vernetti's essay, which is chock-full of his characteristically refreshing wit, deftly situates these paintings within their appropriate art historical lineage while offering amusingly perceptive interpretations. Griffin's personal reflection untangles the various strands of Waddell's oeuvre, and considers what artistic personas the artist adopts when addressing his audience. The interview between Coon and Waddell, two of the most engaging and exciting figures in the contemporary art scene, lays bare the impulses and influences that drive and inform their performance practices. Despite its content and contributors, this publication just barely scratches the surface of one of Southern California's most intriguing artists, and will leave readers delightfully unquenched.

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

There is no law in Physics which says that matter is the sole basis of all that exists. As a matter of fact, Quantum Mechanics (of which classical Physics is an approximation) does not even postulate the existence of matter: it merely postulates the probability of the existence of matter. That does not explain the experimental fact that matter exists in reality. The author quotes an existing hypothesis that an entity independent of matter (called Universal Consciousness) changes the probability of matter into the existence of matter. When this hypothesis is added to the laws of Physics it removes some anomalies in Physics and leads to the clarification of other anomalies in Biology. The present malaise in society is due to a contradiction between what modern materialistic social sciences teach and what individuals find natural and acceptable. The acceptance of the new paradigm facilitates the development of social theories which accept social compassion and ecological balance as their basis.

Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the foster care system. Over the next dozen years, she shuffled from home to home. Finding her roots seemed an impossible dream. But dreams are resilient. An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain community. Aided by her unique eye color, a healthy dose of luck, and the private investigator she hires, Taryn finds her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll risk everything to uncover the truth and to claim the family--and the roots--she so desperately craves.
