Focuses on the analysis,
optimization and
controllability of time-
discrete dynamical systems
and games under the aspect
of stability, controllability
and (for games) cooperative
and non-cooperative
treatment. The investigation
of stability is based on
Lyapunov's method which is
generalized to non-
autonomous systems.
Optimization and
controllability of dynamical
systems is treated, among
others, with the aid of
mapping theorems such as
implicit function theorem
and inverse mapping

theorem. Dynamical games
are treated as cooperative
and non-cooperative games
and are used in order to deal
with the problem of carbon
dioxide reduction under
economic aspects. The
theoretical results are
demonstrated by various
applications.

Known for accuracy, precision, and rigor, Soo Tan now brings those same qualities to the Calculus course. With his clear, concise writing style, and use of relevant, real world examples, Tan introduces abstract mathematical concepts with his intuitive approach that captures student interest without compromising mathematical rigor. In keeping with this emphasis on conceptual understanding, each exercise set begins with concept questions and each end-of-chapter review section includes fill-in-the-blank questions which help students master the definitions and theorems in each chapter. Additionally, many questions asking for the interpretation of graphical, numerical, and algebraic results are

included among both the examples and the exercise sets. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Awakening in a bleak landscape, Cass Dollar vaguely recalls enduring something terrible. Having no idea how many days—or weeks—have passed, she slowly realizes the horrifying truth: her daughter, Ruthie, has vanished. And with her, nearly all of civilization. Instead of winding through the once-lush hills, the roads today see only cannibalistic Beaters—people turned hungry for human flesh by a government experiment gone wrong. In a broken, barren California, Cass will undergo a harrowing quest to get Ruthie back. Few people trust an outsider—much less one who bears the telltale scars of a Beater attack—but she finds safety with an enigmatic outlaw, Smoke. And she'll need him more than ever when his ragged band of survivors learn that she and Ruthie have become the most feared, and desired, weapons in a brave new world....
