## Head First Design Patterns Routledge

With rapid progress in Internet and digital imaging technology, there are more and more ways to easily create, publish, and distribute images.

Considered the first book to focus on the relationship between digital imaging and privacy protection, Visual Cryptography and Secret Image Sharing is a complete introduction to novel security methods and sharing-control mechanisms used to protect against unauthorized data access and secure dissemination of sensitive information. Image data protection and image-based authentication techniques offer efficient solutions for controlling how private data and images are made available only to select people. Essential to the design of systems used to manage images that contain sensitive data—such as medical records, financial transactions, and electronic voting systems—the methods presented in this book are useful to counter traditional encryption techniques, which do not scale well and are less efficient when applied directly to image files. An exploration of the most prominent topics in digital imaging security, this book discusses: Potential for sharing multiple secrets Visual cryptography schemes—based either on the probabilistic reconstruction of the secret image, or on different logical operations for combining shared images Inclusion of pictures in the distributed shares Contrast enhancement techniques Color-image visual cryptography Cheating prevention Alignment problems for image shares Steganography and authentication In the continually evolving world of secure image sharing, a growing number of people are becoming involved as new applications and business models are being developed all the time. This contributed volume gives academicians, researchers, and professionals the insight of well-known experts on key concepts, issues, trends, and technologies in this emerging field.

“ A near-future layering of East and West, of religion and technology . . . and of love and its loss—all woven into an intriguing tapestry. ” —Diana Gabaldon, bestselling author of the Outlander series Winner of the Homer Award for Best Science Fiction Novel A renowned prima ballerina, Lucia del Mar is far more comfortable expressing herself through dance than with words. Shy and introverted, she spends most of her spare time on her laptop. Still, Lucia ' s job forces her out of her comfort zone, which is how she winds up at a White House reception where she meets Rashid al-Jazari, the wealthy CEO of a multinational corporation. Although attracted to him, Lucia can ' t help but feel awkward and shrugs off their encounter as a one-time event. Not realizing he feels a similar attraction, she never imagines Rashid will seek out her performances; he is the last person she expects to see when her dance company travels to Italy. Their reunion takes an even more unexpected turn when they ' re both drugged and kidnapped. Although they overcome their abductors, it leaves them stranded in North Africa. For her own safety, Lucia agrees to marry Rashid, at least for the time being. As she recovers at his family compound in Morocco, reeling from their brush with danger, she struggles to fit into a culture she knows nothing about—and to deal with her growing feelings for

Rashid. At the same time, at his secret office there, Rashid is developing a dramatic leap forward in artificial intelligence combined with virtual reality. He finds himself plunged into a fight for control of his work against powerful international forces, and caught in the middle, Lucia is swept into that battle . . . “ A terrific novel, ripping a path from today ' s headlines to tomorrow ' s realities. ” —Robert J. ## Emotion, Reason, and Action in Kant Routledge

This book is open access and

available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com). It is funded by Knowledge Unlatched. Though Kant never used the word 'emotion' in his writings, it is of vital significance to understanding his philosophy. This book offers a captivating argument for reading Kant considering the importance of emotion, taking into account its many manifestations in his work including affect and passion. Emotion, Reason, and Action in Kant explores how, in Kant's world view, our actions are informed, contextualized and dependent on the tension between emotion and reason. On the one hand, there are positive moral emotions that can and should be cultivated. On the other hand, affects and passions are considered illnesses of the mind, in that they lead to the weakness of the will, in the case of affects, and evil, in the case of passions. Seeing the role of these emotions enriches our understanding of Kant's moral theory. Exploring the full range of negative and positive emotions in Kant's work, including anger, compassion and sympathy, as well as moral feeling, Borges shows how Kant's theory of emotion includes both physiological and cognitive aspects. This is an important new contribution to Kant Studies, suitable for students of Kant, ethics, and moral psychology. *Information Security Policies Made Easy Version 10* McGraw-Hill Companies

The Ming dynasty (1368-1644), a period of commercial expansion and cultural innovation, fashioned the relationship between state and society in Chinese history. This unique collection of reworked and heavily illustrated essays, by one of the leading scholars of Chinese history, re-examines this relationship. It argues that, contrary to previous scholarship, it was radical responses within society that led to a 'constitution', not periods of fluctuation within the dynasty itself. Brook's outstanding scholarship demonstrates that it was changes in commercial relations and social networks that were actually responsible for the development of a stable society. This imaginative reconsidering of existing scholarship on the history of China will be fascinating reading for scholars and students interested in China's development.

Godric St. Laurent, Duke of Essex: A rake. A scoundrel. And now he's a kidnapper. Godric St. Laurent, Duke of Essex, relishes the rakish reputation society has branded him with. He has no plans to marry anytime soon--if ever. When he kidnaps an embezzler's niece for revenge, the difficult debutante's blend of sweetness and sharp tongue both infuriate and intrigue him. Miss Emily Parr is determined to rid herself of domineering men in her life. Her plan is in shambles after she's kidnapped by the incorrigible duke. As she tries to outwit him, she finds herself... enjoying not only the scorching kisses he steals but also his companionship. Of course the most wicked and unwedtable man she's ever met would be the one she can't imagine living without. As they surrender to passion, danger from Godric's past threatens to destroy the one thing he and Emily swore they never wanted: love. Warning: This novel includes a lady who refuses to stay kidnapped, a devilish duke with a dark past, and an assortment of charming rogues who have no idea what they've gotten themselves into. This Illustrated Edition contains 28 Stunning Color illustrations by Flo Minowa depicting the adventures of Godric, Emily and the League of Rogues. \*Note: this edition contains steamy illustrations of passionate scenes.

Decolonising the University Routledge

"A must-read for anyone interested in enhancing a historical understanding of our present through a consideration of what it means to decolonize."--Priyamvada Gopal, University of Cambridge In 2015, students at the University of Cape Town demanded the removal of a statue of Cecil Rhodes, the

imperialist, racist business magnate, from their campus. Their battle cry, #RhodesMustFall, sparked an international movement calling for the decolonization of universities all over the world. Today, as the movement develops beyond the picket line, how might it go on to radically transform the terms upon which universities exist? In this book, students, activists, and scholars discuss the possibilities and the pitfalls of doing decolonial work in the heart of the establishment. Subverting curricula, demanding diversity, and destroying old boundaries, this is a radical call for a new era of education.

Chapters include: \*Rhodes Must Fall: Oxford and Movements for Change (Dalia Febrial) \*Race and the Neoliberal University ((John Holmwood) \*Black/Academia (Robbie Shilliam) \*The Challenge for Black Studies in the Neoliberal University (Kehinde Andrews) \*Open Initiatives for Decolonising the Curriculum (Pat Lockley) \*Decolonising Education: A Pedagogic Intervention (Carol Azumah Dennis) \*Understanding Eurocentrism as a Structural Problem of Undone Science (William Jamal Richardson) As the book's insightful Introduction states, "Taking colonialism as a global project as a starting point, it becomes difficult to turn away from the Western university as a key site through which colonialism--and colonial knowledge in particular--is produced, consecrated, institutionalized and naturalized." Offering resources for students and academics to challenge and resist colonialism inside and outside the classroom, *Decolonizing the University* provides the tools for radical change in educational disciplines, pedagogies, and institutions.
