While the world of education moves toward the end of the crisis brought forth in 2020, we should recognize all the opportunities that remote education can bring us. To fully engage those opportunities, we need to learn more about the tools we use. As you were teaching your online classes, you were probably considering things like, How can I choose a good microphone? How can I stop students from interrupting each other? How can I best exploit breakout rooms? How can I use Zoom for pre-recording presentations? You ' ll also find out more about important areas like Zoom ' s screen sharing system, important security measures, coping with Zoom fatigue, and using Zoom for academic conferences. Most of us learned enough about Zoom to get us through our classes, but Zoom is capable of much more. This second book of the Teaching With Zoom series discusses best practices, supplementary hardware and software choices, and tips to make your Zoom classroom safer, more productive, and more enjoyable.

Language Resources (LRs) are sets of language data

and descriptions in machine readable form, such as written and spoken language corpora, terminological databases, computational lexica and dictionaries, and linguistic software tools. Over the past few decades, mainly within research environments, LRs have been specifically used to create, optimise or evaluate natural language processing (NLP) and human language technologies (HLT) applications, including translation-related technologies. Gradually the infrastructures and exploitation tools of LRs are being perceived as core resources in the language services industries and in localisation production settings. However, some efforts ought yet to be made to raise further awareness about LRs in general, and LRs for translation and localisation in particular to a wider audience in all corners of the world. Topics in Language Resources for Translation and Localisation sets out to establish the state of the art of this ever expanding field and underscores the usefulness that LRs can potentially have in the process of creating, adapting, managing, standardising and leveraging content for more than one language and culture from various perspectives.
