Genealogy of the
Lefferts Family,
1650-1718
Wentworth Press
Since 1958 the
Maritime
Administration has

continuously
conducted
instructions in use
of collision
avoidance radar for
qualified U.S.
seafaring personnel
and representatives
of interested
Federal and State
Agencies. Beginning
in 1963, to facilitate
the expansion of
training capabilities
and at the same
time to provide the
most modern
techniques in
training methods,
radar simulators
were installed in
Maritime
Administration's
three region
schools. It soon
became apparent

that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise

and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs Sound & Vision

In 1917, Johann Radon published his fundamental work, where he introduced what is now called the Radon transform. Including important contributions by several experts, this book reports on ground-breaking developments related to the Radon transform throughout these years, and also discusses novel mathematical research topics and applications for the next century.
