With the multitude of green choices available, how can moms determine what will be best for their families—and the environment? Terra Wellington has the answers. This user-friendly and invaluable resource is packed with hundreds of easy green how-tos including:

- Shopping: Get the most bang for your buck by purchasing organic foods that would otherwise have high pesticide residue, like apples, grapes, green peppers, peaches, and pears.
- Kitchen: Save money and water by scraping—not rinsing—dishes before putting them in the dishwasher. Today's models are so efficient that rinsing is not necessary.
- Home office: Screensavers don't save energy. Instead have the computer switch to sleep mode when idle.

HWM Taylor & Francis

Volume 1: Packaging is an authoritative reference source of practical information for the design or process engineer who must make informed day-to-day decisions about the materials and processes of microelectronic packaging. Its 117 articles offer the collective knowledge, wisdom, and judgement of 407 microelectronics packaging experts-authors, co-authors, and reviewers-representing 192 companies, universities, laboratories, and other organizations. This is the inaugural volume of ASMAs all-new ElectronicMaterials Handbook series, designed to be the Metals Handbook of electronics technology. In over 65 years of publishing the Metals Handbook, ASM has developed a unique editorial method of compiling large technical reference books. ASMAs

access to leading materials technology experts enables to organize these books on an industry consensus basis. Behind every article. Is an author who is a top expert in its specific subject area. This multi-author approach ensures the best, most timely information throughout. Individually selected panels of 5 and 6 peers review each article for technical accuracy, generic point of view, and completeness. Volumes in the Electronic Materials Handbook series are multidisciplinary, to reflect industry practice applied in integrating multiple technology disciplines necessary to any program in advanced electronics. Volume 1: Packaging focusing on the middle level of the electronics technology size spectrum, offers the greatest practical value to the largest and broadest group of users. Future volumes in the series will address topics on larger (integrated electronic assemblies) and smaller (semiconductor materials and devices) size levels.

An accessible and comprehensive guide to the future of computing. Cloud Computing is the next computing revolution and will have as much impact on your life as the introduction of the PC. Using websites including Facebook, Flickr and Gmail, many people already store some information out in the Internet cloud. However, within a few years most computing applications will be accessed online with the web at the heart of everything we do. In this valuable guide, expert Christopher Barnatt explains how computing will rapidly become more reliable, less complex, and more environmentally friendly. He explores online software and hardware, and how it will alter our office work and personal lives. Individuals and companies are going to be released from the constraints of desktop computing and expensive corporate data centres. New services like augmented reality will also become available. Including coverage of Google Docs, Zoho, Microsoft Azure, Amazon EC2 and other key developments, this book is your essential guide to the

cloud computing revolution.
