This book explores the challenges that emerging technologies and technology driven practices pose for traditional notions of intellectual property (IP) law and policy. Chapters offer perspectives from across the IP law spectrum and address questions such as; is the law evolving in the right direction and is the regulation of emerging technology supported by sound policy objectives? Covering a diverse range of topics, this book exposes the intimate relationship

between IP and technology.

The New Manual of Astrology Taylor & Francis  
This illuminating new book presents a series of in-depth case studies from around the world based on numerous personal interviews with organizational leaders and focusing on their journey towards sustainability. The aim is to provide visions of a more sustainable future, and shed light on the path, milestones and solutions – in particular the management processes these organizations employed – to provide a reliable compass that others can follow. Although each organization must take steps to fit its particular circumstance, business conditions and culture, Mapping the Journey proves that valuable lessons can be learned by setting aside critique as to where these organizations may yet make progress and instead focusing on the guidelines, targets, measures of success, tools and techniques and valuable wisdom about how pioneer organisations are travelling toward a prosperous, sustainable future. Each organization included has crafted its own unique strategic responses to an identified need for increased sustainability. While none can be said to have reached the end-point of a sustainable development strategy, all have found that, by addressing the challenge of sustainable industrial practices, they have found innovative solutions, new opportunities for revenue generation, better relationships with customers, new business and product opportunities and a boost to morale from the executive ranks to front-line employees. Mapping the Journey examines both public and private organizations worldwide: SJ Rail of Sweden; Sony

Corporation; SC Johnson; TransAlta Corporation; Patagonia; Henkel; Volvo; ASG; Interface Flooring Systems; Suncor; DaimlerChrysler; AssiDoman; Germany's Centre for Technology Assessment and the Dutch National Environmental Policy Plan. These case studies provide an inspiring framework of effective processes for defining a sustainable development strategy and transforming it successfully into actions and results.

JOURNAL The Crimson Petal and the White meets Fight Club: A page-turning novel set in the world of female pugilists and their patrons in late eighteenth-century England. Moving from a filthy brothel to a fine manor house, from the world of street fighters to the world of champions, *The Fair Fight* is a vivid, propulsive historical novel announcing the arrival of a dynamic new talent. Born in a brothel, Ruth doesn't expect much for herself beyond abuse. While her sister's beauty affords a certain degree of comfort, Ruth's harsh looks set her on a path of drudgery. That is until she meets pugilist patron George Dryer and discovers her true calling—fighting bare knuckles in the prize rings of Bristol. Manor-born Charlotte has a different cross to bear. Scarred by smallpox, stifled by her social and romantic options, and trapped in twisted power games with her wastrel brother, she is desperate for an escape. After a disastrous, life-changing fight sidelines Ruth, the two women meet, and it alters the perspectives of both of them. When Charlotte presents Ruth with an extraordinary proposition, Ruth pushes dainty Charlotte to enter the ring herself and learn the power of her own strength. A gripping, page-turning story about people struggling to transcend the circumstances

into which they were born and fighting for their own places in society, *The Fair Fight* is a raucous, intoxicating tale of courage, reinvention, and fighting one's way to the top.

\*\*\* There were 54 victims before this. Who is number 55? \*\*\* A thriller with a killer hook, and an ending that will make you gasp! Wilbrook in Western Australia is a sleepy, remote town that sits on the edge of miles and miles of unexplored wilderness. It is home to Police Sergeant Chandler Jenkins, who is proud to run the town's small police station, a place used to dealing with domestic disputes and noise complaints. All that changes on a scorching day when an injured man stumbles into

---

Chandler's station. He's covered in dried blood. His name is Gabriel. He tells Chandler what he remembers. He was drugged and driven to a cabin in the mountains and tied up in iron chains. The man who took him was called Heath. Heath told Gabriel he was going to be number 55. His 55th victim. Heath is a serial killer. As a manhunt is launched, a man who says he is Heath walks into the same station. He tells Chandler he was taken by a man named Gabriel. Gabriel told Heath he was going to be victim 55. Gabriel is the serial killer. Two suspects. Two identical stories. Which one is the truth? James Delargy has written one of the most exciting debuts of 2019. He masterfully paints the picture of a remote Western Australian town and its people, swallowed whole by the hunt for a serial killer. This novel has been sold in 19 countries so far and has just been optioned for film.

What an amazing career. Tom Stafford attained the highest speed ever reached by a test pilot (28,547 mph), carried a cosmonaut's coffin with Soviet Secretary Leonid Brezhnev, led the team that designed the sequence of missions leading to the original lunar landing, and drafted the original specifications for the B-2 stealth bomber on a piece of hotel stationery. But his crowning achievement was surely his role as America's unofficial space ambassador to the Soviet Union during the darkest days of the Cold War. In this lively memoir written with Michael Cassutt, Stafford begins by recounting his early successes as a test pilot, Gemini and Apollo astronaut, and USAF general. As President Nixon's stand-in at the 1971 Soviet funeral for three cosmonauts, he opened the door to the possibility of cooperation in space between Russians and Americans. Stafford's Apollo-Soyuz team was the first group of Americans to work at the cosmonaut training center, and also the first to visit Baikonur, the top-secret Soviet launch center, in 1974. His 17 July 1975 "handshake in space" with Soviet commander Alexei Leonov (who became a lifelong friend) proved to the world that the two opposing countries could indeed work successfully together. Stafford has continued in this leadership role right up to the present, participating in designing and evaluating the Space Shuttle, Mir, and the International Space Station. He is truly an

American hero who personifies the broadest spirit of exploration and cooperation.

This volume focuses on the responsibilities of online service providers (OSPs) in contemporary societies. It examines the complexity and global dimensions of the rapidly evolving and serious challenges posed by the exponential development of Internet services and resources. It looks at the major actors – such as Facebook, Google, Twitter, and Yahoo! – and their significant influence on the informational environment and users’ interactions within it, as well as the responsibilities and liabilities such influence entails. It discusses the position of OSPs as information gatekeepers and how they have gone from offering connecting and information-sharing services to paying members to providing open, free infrastructure and applications that facilitate digital expression and the communication of information. The book seeks consensus on the principles that should shape OSPs’ responsibilities and practices, taking into account business ethics and policies. Finally, it discusses the rights of users and international regulations that are in place or currently lacking.

Regulating Hosting ISPs’ Responsibilities for Copyright Infringement McGraw Hill Professional

This book employs a comparative approach to comprehensively discuss hosting ISPs’ (Internet Service Providers’) responsibilities for copyright infringement in the US, EU and China. In particular, it details how the current responsibility rules should be interpreted or revised so as to provide hosting ISPs maximum freedom to operate in these jurisdictions. In addition to examining relevant state regulations, the book assesses self-regulation norms agreed upon between copyright owners and hosting ISPs, and concludes that self-regulation is better suited to preserving hosting ISPs’ freedom to operate. The results of this study will be interesting for a broad readership, including academics and practitioners whose work involves hosting ISPs’ copyright responsibilities.
