Avid Editing is a comprehensive guide covering Avid Xpress Pro, XPress Pro HD, and Xpress DV. Due to the similarity of Avid's interface across product lines, it is also relevant for Media Composer and other systems. Suitable for beginning editors or experienced editors new to the Avid, the book provides step-by-step instructions for hundreds of editing tasks in jargon-free terms. The chapters guide you through an editing project, while the accompanying DVD provides narrative footage to download for immediate, hands-on practice. The book can be read and studied at home, or while sitting in front of an Avid, following the book's step-by-step instructions. More than a software manual, this book delves into general editing techniques, principles, and pitfalls. The author is an experienced teacher who will help you master the Avid

as well as improve your overall editing skills. This edition covers working with HD, the 16:9 widescreen, and the powerful Script Integration tool. In addition, there's new coverage of the issues facing indie filmmaker who is trying to decide how to go from the DV stage (shooting on mini-DV or DVCAM formats) to theatrical distribution. As well, there is new material on using Avid in PAL regions.

Practising Videojournalism Independently Published
This comprehensive edited volume is the first of its kind, designed to serve as a textbook for long-duration business analytics programs. It can also be used as a guide to the field by practitioners. The book has contributions from experts in top universities and industry. The editors have taken extreme care to ensure continuity across the chapters. The material is organized into three parts: A) Tools, B) Models and C)

Applications. In Part A, the tools used by business analysts are described in detail. In Part B, these tools are applied to construct models used to solve business problems. Part C contains detailed applications in various functional areas of business and several case studies. Supporting material can be found in the appendices that develop the pre-requisites for the main text. Every chapter has a business orientation. Typically, each chapter begins with the description of business problems that are transformed into data questions; and methodology is developed to solve these questions. Data analysis is conducted using widely used software, the output and results are clearly explained at each stage of development. These are finally transformed into a business solution. The companion website provides examples, data sets and sample code for each chapter.
