As Cecelia fights boredom in her small country town, Kate visits London to mingle with the brightest lights of English society. At the initiation of a powerful magician into the Royal College of Wizards, Kate finds herself alone with a mysterious witch who offers her a sip from a

chocolate pot. When Kate refuses the drink, the chocolate burns through her dress and the witch disappears. It seems that strange forces are convening to destroy a beloved wizard, and only Kate and Cecelia can stop the plot. But for two girls who have to contend with the pressures of choosing dresses and beaux for their debuts, deadly magic is only one of their concerns. The psychologist may appear in science fiction as the herald of utopia or dystopia; literary studies have used psychoanalytic theories to interpret science fiction; and psychology has employed science fiction as an educational medium. Science Fiction and Psychology goes beyond such incidental observations and engagements to offer an in-depth exploration of science fiction literature's varied use of

psychological discourses, beginning at the birth of modern psychology in the late nineteenth century and concluding with the ascendancy of neuroscience in the late twentieth century. Rather than dwelling on psychoanalytic readings, this literary investigation combines with history of psychology to offer attentive textual readings that explore five key psychological schools: evolutionary psychology, psychoanalysis, behaviourism, existential-humanism, and cognitivism. The varied functions of psychological discourses in science fiction are explored, whether to popularise and prophesy, to imagine utopia or dystopia, to estrange our everyday reality, to comment on science fiction itself, or to abet (or resist) the spread of psychological wisdom. *Science Fiction and Psychology* also considers how psychology itself has made use of science fiction in order to teach, to secure legitimacy as a discipline, and to comment on the present.

A Genealogy of the Descendants of John, Christopher and William Osgood, Who Came from England and Settled in New England Early in the Seventeenth Century Open Road Media

Recently, scholars of Olmec visual culture have identified symbols for umbilical cords, bundles, and cave-wombs, as well as a significant number of women portrayed on monuments and as figurines. In this groundbreaking study, Carolyn Tate demonstrates that these subjects were part of a major emphasis on gestational imagery in Formative Period Mesoamerica. In *Reconsidering Olmec Visual Culture*, she identifies the presence of women, human embryos, and fetuses in monuments and portable objects dating from 1400 to 400 BC and originating throughout much of Mesoamerica. This highly original study sheds new light on the prominent roles that women and gestational beings played in Early Formative societies, revealing female shamanic practices, the generative concepts that motivated caching and bundling, and the expression of feminine knowledge in the 260-day cycle and related divinatory and ritual activities.

Reconsidering Olmec Visual Culture is the first study that situates the unique hollow babies of Formative Mesoamerica within the context of prominent females and the prevalent imagery of gestation and birth. It is also the first major art historical study of La Venta and the first to identify Mesoamerica's earliest creation narrative. It provides a more

nuanced understanding of how later societies, including Teotihuacan and West Mexico, as well as the Maya, either rejected certain Formative Period visual forms, rituals, social roles, and concepts or adopted and transformed them into the enduring themes of Mesoamerican symbol systems.

The Translucent Boy and the Girl Who Saw Him Penguin

Since the rise of the contemporary ecology movement in the 1960s, American songwriters and composers, from folk singer Pete Seeger to jazz saxophonist Paul Winter, have lamented, and protested against, environmental degradation and injustice. The Jukebox in the Garden is the first book to survey a wide range of musical styles, including folk, country, blues, rock, jazz, electronica and hip hop, to examine the different ways in which popular music has explored American relationships between nature, technology and environmental politics. It also investigates the growing link between music and philosophical thought, particularly under the influence of both deep ecology and New Age thinking, according to which music, amongst all the arts, has a special affinity with ecological ideas. This book is both an exploration and critique of such speculations on the role that music can play in raising environmental awareness. It combines description and analysis of American popular music made during the era of modern environmentalism with a consideration of its wider social, historical and political contexts. It will be of interest to undergraduates and post-graduates in music, cultural studies and environmental studies, as

well as general readers interested in popular music and the environment.

The Story of a French Homestead in the Old Northwest
Tom Hoffman Graphic Design

An inept wizard-in-training is the only one who can save his classmates from the terrible sorcery that threatens to devour their magical school. Acclaimed master fantasist Jane Yolen imagines an academic world of wonders where paintings speak, walls move, monsters are made real, and absolutely anything can happen—as she introduces readers to a hero as hapless as the legendary Merlin is powerful. It was Henry's dear ma who decided to send him off to Wizard's Hall to study sorcery, despite the boy's apparent lack of magical talent. He has barely stepped through the gates of the magnificent school when he is dubbed Thornmallow ("prickly on the outside, squishy within"). Still, regardless of his penchant for turning even the simplest spell into a disaster, Thornmallow's teachers remain kind and patient, and he soon has a cadre of loyal, loving friends. But there is something that no one is telling the boy: As the 113th student to enroll in the wondrous academy, Thornmallow has an awesome and frightening duty to fulfill—and failure will mean the destruction of Wizard's Hall and everyone within its walls.

Hawking's Hallway Franklin Classics

The very strange but nevertheless true story of the dark underbelly of a 1960s hippie utopia. Laurel Canyon in the 1960s and early 1970s was a magical place where a dizzying array of musical artists congregated to create much of the music that provided the soundtrack to those turbulent times. Members of bands like the Byrds, the Doors, Buffalo Springfield, the Monkees, the Beach Boys, the Turtles, the Eagles, the Flying Burrito Brothers, Frank Zappa and the Mothers of Invention, Steppenwolf, CSN, Three Dog Night and Love, along with such singer/songwriters as Joni Mitchell, Judy Collins, James Taylor and Carole King, lived together and jammed together in the bucolic community nestled in the Hollywood Hills. But there was a dark side to that scene as well. Many didn't make it out alive, and many of those deaths remain shrouded in mystery to this day. Far more integrated into the scene than most would like to admit was a guy by the name of Charles Manson, along with his murderous entourage. Also floating about the periphery were various political operatives, up-and-coming politicians and intelligence personnel – the same sort of people who gave birth to many of the rock stars populating the canyon. And all the canyon's colorful

characters – rock stars, hippies, murderers and politicians happily coexisted alongside a covert military installation.
