David Ellerman relates a deep theoretical groundwork for a philosophy of development, while offering a descriptive, practical suggestion of how goals of development can be better set and met. Beginning with the assertion that development assistance agencies are inherently structured to provide help that is ultimately unhelpful by overriding or undercutting the capacity of people to help themselves, David Ellerman argues that the best strategy for development is a drastic reduction in development assistance. The locus of initiative can then shift from the would-be helpers to the doers (recipients) of development. Ellerman presents various methods for shifting initiative that are indirect, enabling and autonomy-respecting. Eight representative figures in the fields of education, community organization, economic development, psychotherapy and management theory including: Albert Hirschman, Paulo Freire, John Dewey, and Søren Kierkegaard demonstrate how the major themes of assisting autonomy among people are essentially the same. David Ellerman is currently a Visiting Scholar in the Economics Department at the University of California at Riverside.

The Calling offers a groundbreaking twelve-week program to help you discover more fulfilling work, more authentic relationships, and a deeper sense of connection. It's no secret that many working professionals are dissatisfied with their occupations—it's been estimated that more than 75 percent of employees in the US are disengaged or otherwise unhappy in their jobs. This dissatisfaction is often seen as a structural problem—one that can be solved by shuffling people in and out of positions until they find the right fit. Cognitive neuroscientist, researcher, and spiritual seeker Julia Mossbridge has a different take. According to Mossbridge, this lack of engagement and satisfaction in the workforce is a spiritual problem: we find ourselves in stressful or unfulfilling jobs because we don't know ourselves well enough to choose wisely, in alignment with our most heartfelt desires. It's this problem—one of self-knowledge, values, and spiritual attunement—that this book seeks to solve. **The Calling** offers a twelve-week program for discovering your “soul's work.” An intriguing

combination of hard-nosed science and wide-open spirituality, this one-of-a-kind guide will show you how to use the scientific method of observation and experimentation on yourself, in order to determine the nature and scope of your true calling, and then put it into action. You'll also create your own “lab notebook” of personalized information to help you discover, energize, and engage your soul's work. With the insights and strategies in this practical yet spiritual step-by-step book, you'll not only find more satisfying work; you'll also discover greater fulfillment in all areas of your life, including more authentic relationships and a deeper sense of connection with the universe.

Book of the Dead and other Egyptian Papyri and Tablets University of Michigan Press

The Emerald Tablet is purported to be a fourteen step instruction manual for the Alchemical process of turning ordinary metals like lead into something much more valuable, like gold. If you can decipher the meaning, that is. Over the centuries, many have tried. I believe the fourteen statements of the Emerald Tablet to be a symbolic guide to a far greater treasure...Legend has it that this guide was written by Hermes

Trismegistus, an ancient Egyptian philosopher whose discoveries were said to have transformed him, through knowledge of this world, into a god among men, so to speak. The Egyptians thought so highly of him that they equated him with their god Thoth (see front cover) and the Greeks, in similar fashion, equated him with their god Mercury. What is the goal of the Emerald Tablet, as transmitted to us by Hermes through the fourteen cryptic statements? To transform those of us who can decipher its meaning into a higher level of human consciousness. To transform the reader, through knowledge, into what the Egyptians would have called a god among men. "This world is a holographic unity that repeats itself in an endless, infinite continuum in every direction forever."

Huizhou studies the construction of local identity through kinship in the prefecture of Huizhou, the most prominent merchant stronghold of Ming China. Employing an array of untapped genealogies and other sources, Qitao Guo explores how developments in the sociocultural, religious, and gender

realms from the fifteenth to sixteenth centuries intertwined to shape Huizhou identity as a land of "prominent lineages." This gentrified self-image both sheltered and guided the development of mercantile lineages, which were further bolstered by the gender regime and the local religious order. As Guo demonstrates, the discrepancy between representation and practice helps explain Huizhou's triumphs. The more active the economy became, the more those central to its commercialization embraced conservative sociocultural norms. Home lineages embraced neo-Confucian orthodoxy even as they provided the financial and logistical support to assure the success of Huizhou merchants. The end result was not "capitalism" but a gentrified mercantile lineage culture with Chinese—or Huizhou—characteristics.
