The Eye of Love Columbia University Press
A New York Times–bestselling author’s intricately conceived, “remarkably eloquent” response to *Moby-Dick*: a story of harmony between man and whale (The Washington Post). This unique adventure tale follows two characters: one a sonar officer aboard a sinking Russian nuclear submarine; the other a massive, aging sperm whale swimming nearby. As the young man spends what may be his last days with the ship’s lovely surgeon, he listens to the plaintive calls of the whales sounding—calls of compassion, fear, and anger at humankind’s attacks on his species. Little does he realize these fellow creatures may also provide his only hope of survival. Giving voice to these magnificent

mammals, Hank Searls—who in addition to his work as a writer has also been a yachtsman, underwater photographer, and Navy flyer—taps into our ancient connection to the natural world in a fascinating, suspenseful, and provocative drama.

"Strong Medicine" Speaks Diamond Pocket Books Pvt Ltd

From Alexander von Humboldt to Charles and Anne Lindbergh, these are stories of people of great vision and daring whose achievements continue to inspire us today, brilliantly told by master historian David McCullough. The bestselling author of *Truman and John Adams*, David McCullough has written profiles of exceptional men and

women past and present who have not only shaped the course of history or changed how we see the world but whose stories express much that is timeless about the human condition. Here are Alexander von Humboldt, whose epic explorations of South America surpassed the Lewis and Clark expedition; Harriet Beecher Stowe, “ the little woman who made the big war ” ; Frederic Remington; the extraordinary Louis Agassiz of Harvard; Charles and Anne Lindbergh, and their fellow long-distance pilots Antoine de Saint-Exupéry and Beryl Markham; Harry Caudill, the Kentucky lawyer who

awakened the nation to the tragedy of Appalachia; and David Plowden, a present-day photographer of vanishing America. Different as they are from each other, McCullough ’ s subjects have in common a rare vitality and sense of purpose. These are brave companions: to each other, to David McCullough, and to the reader, for with rare storytelling ability McCullough brings us into the times they knew and their very uncommon lives.

History Has Begun Cambridge University Press

It’s 1976 in South Africa. In the black township of Soweto, Zanele works as a nightclub singer and is plotting against the apartheid government. Her best friend Thabo, schoolboy

turned gang member, has troubles of his own--a deal gone wrong and some powerful enemies. Across the bridge, in the wealthy white suburbs, Jack plans to spend his last days in Johannesburg burning miles on his beat-up Mustang--until he meets Zanele. Working in her father's shop, Meena finds a packet of banned pamphlets. A series of chance meetings sets off a chain of events--a failed plot, a murdered teacher, a forbidden love and a growing student movement that sweeps across the country like a blazing fire. When Morning Comes is a part of the Duckbill Not Our War series. The NOW series deals with children growing up in times of conflict--powerless, vulnerable, and yet, against all odds, brave and hopeful of a better future.

Her maps of the ocean floor have been called "one of the most remarkable achievements in modern

cartography", yet no one knows her name.

Soundings is the story of the enigmatic, unknown woman behind one of the greatest achievements of the 20th century. Before Marie Tharp, geologist and gifted draftsman, the whole world, including most of the scientific community, thought the ocean floor was a vast expanse of nothingness. In 1948, at age 28, Marie walked into the newly formed geophysical lab at Columbia University and practically demanded a job. The scientists at the lab were all male; the women who worked there were relegated to secretary or assistant. Through sheer willpower and obstinacy, Marie was given the job of interpreting the soundings (records of sonar pings measuring the ocean's depths) brought back from the ocean-going expeditions of her male colleagues. The marriage of artistry and science behind her analysis of this dry data gave birth to a major work: the first comprehensive map of the ocean floor, which laid the groundwork for proving the then-controversial theory of continental drift. When

combined, Marie's scientific knowledge, her eye for detail and her skill as an artist revealed not a vast empty plane, but an entire world of mountains and volcanoes, ridges and rifts, and a gateway to the past that allowed scientists the means to imagine how the continents and the oceans had been created over time. Just as Marie dedicated more than twenty years of her professional life to what became the Lamont Geological Observatory, engaged in the task of mapping every ocean on Earth, she dedicated her personal life to her great friendship with her co-worker, Bruce Heezen. Partners in work and in many ways, partners in life, Marie and Bruce were devoted to one another as they rose to greater and greater prominence in the scientific community, only to be envied and finally dismissed by their beloved institute. They went on together, refining and perfecting their work and contributing not only to humanity's vision of the ocean floor, but to the way subsequent generations would view the Earth as a whole. With an imagination as intuitive as

Marie's, brilliant young writer Hali Felt brings to vivid life the story of the pioneering scientist whose work became the basis for the work of others scientists for generations to come.

Black Chuck Orca Book Publishers

The heartbreaking story of five generations of young people from a single African-and-American family pursuing an elusive dream of freedom. "Gut wrenching and incredible. " — Sabaa Tahir #1 New York Times bestselling author of *An Ember in the Ashes* "This novel is a remarkable achievement."—Kelly Barnhill, New York Times bestselling author and Newbery medalist "Beautifully epic."—Ibi Zoboi, author *American Street* and National Book Award finalist *Dream Country* begins in suburban Minneapolis at the moment when seventeen-year-old Kollie Flomo begins to crack under the strain of his life as a Liberian refugee. He's exhausted by being at once too

black and not black enough for his African American peers and worn down by the expectations of his own Liberian family and community. When his frustration finally spills into violence and his parents send him back to Monrovia to reform school, the story shifts. Like Kollie, readers travel back to Liberia, but also back in time, to the early twentieth century and the point of view of Togar Somah, an eighteen-year-old indigenous Liberian on the run from government militias that would force him to work the plantations of the Congo people, descendants of the African American slaves who colonized Liberia almost a century earlier. When Togar's section draws to a shocking close, the novel jumps again, back to America in 1827, to the children of Yasmine Wright, who leave a Virginia plantation with their mother for Liberia, where they're promised freedom and a

chance at self-determination by the American Colonization Society. The Wrights begin their section by fleeing the whip and by its close, they are then the ones who wield it. With each new section, the novel uncovers fresh hope and resonating heartbreak, all based on historical fact. In *Dream Country*, Shannon Gibney spins a riveting tale of the nightmarish spiral of death and exile connecting America and Africa, and of how one determined young dreamer tries to break free and gain control of her destiny.

I.D. Pen and Sword History

Popular consensus says that the US rose over

two centuries to Cold War victory and world domination, and is now in slow decline. But is this right? History's great civilizations have always lasted much longer, and for all its colossal power, American culture was overshadowed by Europe until recently. What if this isn't the end? In *History Has Begun*, Bruno Maçães offers a compelling vision of America's future, both fascinating and unnerving. From the early American Republic, he takes us to the turbulent present, when, he argues, America is finally forging its own path. We can see the birth pangs of this new civilization in today's debates on guns, religion, foreign policy and the significance of Trump. Should the coronavirus pandemic be regarded as an opportunity to build a new kind of society? What will its values be, and what will this new America look like? Maçães traces the long

arc of US history to argue that in contrast to those who see the US on the cusp of decline, it may well be simply shifting to a new model, one equally powerful but no longer liberal.

Consequently, it is no longer enough to analyze America's current trajectory through the simple prism of decline vs. progress, which assumes a static model-America as liberal leviathan.

Rather, Maçães argues that America may be casting off the liberalism that has defined the country since its founding for a new model, one more appropriate to succeeding in a transformed world.

The Story of the Earth in 25 Rocks Henry Holt and Company

Margery Sharp 's enchanting New York Times – bestselling novel about the profound ways that love can change our view of other people and the world around us Miss Dolores Diver and Harry Gibson have been passionately in love ever since they met at the Chelsea Arts Ball: He came as a brown paper parcel, she as a Spanish dancer. Only the eye of love could have transformed plain Dolores into a Spanish rose and stout Harry into the man of Dolores 's dreams. But ten years later,

during the Great Depression, Harry must marry his colleague's daughter in order to save his nearly bankrupt business. The course of true love never runs smoothly but with some inadvertent help from Dolores's keenly observant nine-year-old niece, Martha, Harry's grasping fiancée, and Dolores's calculating lodger, Harry might succeed in both averting financial ruin and reclaiming his beloved.

From the day that French explorer Robert Cavalier de La Salle launched the Griffin in 1679 to the 1975 sinking of the celebrated Edmund Fitzgerald, thousands of commercial ships have sailed on the vast and perilous waters of the Great Lakes. In a harbinger of things to come, on the return leg of its first trip in late summer 1679, the Griffin disappeared and has never been seen again. In the centuries since then, the records show that an alarming

number of shipwrecks have occurred on the Great Lakes. If vessels that wrecked but were later repaired and returned to service are included, the number certainly swells into the thousands. Most did not mysteriously vanish like the Griffin. Instead, they suffered the occupational hazards of every lake boat: collisions, groundings, strands, fires, boiler explosions, and capsizes. Many of these disasters took the lives of crews and passengers. The fearsome wrath of the storms that brew over the Great Lakes has challenged and defeated some of the staunchest vessels constructed in the shipyards of port cities along the U.S. and Canadian lakeshores. Here Richard Gebhart tells the tales of some of these ships and their captains and crews, from their launches to their sad demises—or sometimes, their celebrated retirements. This volume is a must-read for

anyone intrigued by the maritime history of the Great Lakes.

Rowdy Orca Book Publishers

When Christopher Madsen made the snap decision-perhaps a rash decision-to buy and renovate the famous 1916 racing yacht for which this story is named, he could scarcely have imagined the consequences that were to follow. During the renovation Madsen's investigation of the original owner, New York senator Holland Sackett Duell, uncovered a remarkable true life 1920s adventure and love story; one which fully brings to life the era and

flair of Gatsby and Hemmingway yet, by contrast, Rowdy is completely true, historically significant and meticulously documented in support of the authenticity. The reader first walks in Duell's footsteps as he departs New York in 1918 to participate in the Great War (the most detailed accounting ever written on New York's 306th Field Artillery, 77th Division). Highly decorated upon return, the adventure continues as Duell is immersed in politics at the highest level, the birth of Hollywood, sailing competitions with some of the richest men in America, fortunes and mansions and love affairs as well as scandalous affairs. A newly unearthed gem in American history, Rowdy will enjoyably transport the reader back in time to the Golden Age of Yachting-AND EVER SO MUCH MORE!A multi-award winning story and a beautiful

coffee table book; 8 A1/2 X 11 hardcover with the look of worn, vintage leather, gold leaf stamping, rounded spine woven burgundy book mark. Full reviews, sample pages, awards etc., at <http://www.rowdystory.com>

Much of human experience can be distilled to saltwater: tears, sweat, and an enduring connection to the sea. In *Vast Expanses*, Helen M.

Rozwadowski weaves a cultural, environmental, and geopolitical history of that relationship, a journey of tides and titanic forces reaching around the globe and across geological and evolutionary time. Our ancient connections with the sea have developed and multiplied through industrialization and globalization, a trajectory that runs counter to Western depictions of the ocean as a place remote from and immune to human influence.

Rozwadowski argues that knowledge about the oceans—created through work and play, scientific investigation, and also through human ambitions for profiting from the sea—has played a central role in defining our relationship with this vast, trackless, and opaque place. It has helped us to exploit marine resources, control ocean space, extend imperial or national power, and attempt to

refashion the sea into a more tractable arena for human activity. But while deepening knowledge of the ocean has animated and strengthened connections between people and the world's seas, to understand this history we must address questions of how, by whom, and why knowledge of the ocean was created and used—and how we create and use this knowledge today. Only then can we forge a healthier relationship with our future sea.

' MEIN KAMPF ' is the autobiography of Adolf Hitler gives detailed insight into the mission and vision of Adolf Hitler that shook the world. This book is the merger of two volumes. The first volume of MEIN KAMPF ' was written while the author was imprisoned in a Bavarian fortress. The book deals with events which brought the author into this blight. It was the hour of Germany's deepest humiliation, when Napoleon has dismembered the old German Empire and French soldiers occupied almost the whole of Germany.

The book narrates how Hitler was arrested with several of his comrades and imprisoned in the fortress of Landsberg on the river Lech. During this period only the author wrote the first volume of MEIN KAMPF. The Second volume of MEIN KAMPF was written after release of Hitler from prison and it was published after the French had left the Ruhr, the tramp of the invading armies still echoed in German ears and the terrible ravages had plunged the country into a state of social and economic Chaos. The beauty of the book is, MEIN KAMPF is an historical document which bears the imprint of its own time. Moreover, Hitler has declared that his acts and ‘ public statements ’ constitute a partial revision of his book and are to be taken as such. Also, the author has translated Hitler ’ s ideal, the Volkischer Staat, as the People ’ s State. The author has tried his best making German Vocabulary easy to understand. You will never be satisfied until go through the whole book. A must read book, which is one of the

most widely circulated and read books worldwide. Sounding Orca Book Publishers Layering climate science, mythologies, nature writing, and personal experiences, this New York Times Notable Book presents a stunning reckoning with our current moment and with the literal and figurative end of time. Desert Notebooks examines how the unprecedented pace of destruction to our environment and an increasingly unstable geopolitical landscape have led us to the brink of a calamity greater than any humankind has confronted before. As inhabitants of the Anthropocene, what might some of our own histories tell us about how to confront apocalypse? And how might the geologies and ecologies of desert spaces inform how we see and act toward time—the pasts we have erased and paved over, this anxious present, the future we have no choice but to

build? Ehrenreich draws on the stark grandeur of the desert to ask how we might reckon with the uncertainty that surrounds us and fight off the crises that have already begun. In the canyons and oases of the Mojave and in Las Vegas ' s neon apocalypse, Ehrenreich finds beauty, and even hope, surging up in the most unlikely places, from the most barren rocks, and the apparent emptiness of the sky. Desert Notebooks is a vital and necessary chronicle of our past and our present—unflinching, urgent—yet timeless and profound.
