Two of America ' s most popular authorities on healthy eating and cooking join forces in this inspiring, easy-to-use cookbook. This is not a diet book. It is a lively guide to healthy cooking, day-by-day, packed with essential information and, above all, filled with enticing food. Andrew Weil, M.D.—author of the best-selling *Eating Well for Optimum Health*—brings to this perfect collaboration a comprehensive philosophy of nutrition grounded in science. Rosie Daley—acclaimed for her best-seller, *In the Kitchen with Rosie*—brings to it her innovative and highly flavorful spa cuisine. The recipes are

eclectic, drawing from the healthy and delicious cooking of the Middle East, the Mediterranean, and Asia, among other cuisines. For starters, you might try Grilled Satay or a Miso P â t é ; for soup, often a meal in itself, a hearty Mixed-Bean Minestrone Stew or a Roasted Winter Squash and Apple Soup with Cilantro Walnut Pesto; a special entr é e could be the Savory Roasted Cornish Hens with Roasted Garlic or Baked Spicy Tofu with Bean Thread Noodles, Corn, and Mango; for a simple supper, Turkey Burgers or Portobello Burgers; and for the occasional indulgence, a dessert of Almond Fruit Tart or Peach and Blueberry Cobbler. Andy and Rosie do not always agree. When Rosie calls for chicken, Andy offers a tofu alternative; she likes the flavor of coconut milk, whereas he prefers ground nut milk; when she makes a pastry with butter, he suggests using Spectrum Spread. There are no hard-and-fast rules. Lifelong health begins in the kitchen, so this is a lifestyle book as well as a cookbook. In it you will learn from Dr. Weil: • how to make use of nutritional information in everyday cooking • what is organic . . . and how to buy organic foods • the importance of reading labels and what to look for • sensible advice about eggs, milk, cheese, salt, spicy foods, wine, coffee • the facts about sugar and artificial sweeteners . . . and from Rosie: • how to get kids involved—from skinning almonds to layering lasagna • ways to have fun in the kitchen—creating scallion firecrackers and radish rosettes • low-fat and nondairy alternatives for

those with special concerns • smart menu planning—letting the seasons be your guide . . . and lots more. This revolutionary book will change forever the way you cook for yourself and your family. With 58 photographs in full color.

Notebook for Natures St. Martin's Press Over the past 20 years, software architectures have significantly contributed to the development of

complex and distributed systems.

Nowadays, it is recognized that one of the critical problems in the design and development of any complex software system is its architecture, i.e. the organization of its architectural elements. Software Architecture presents the software architecture paradigms based on objects, components, services and models, as well as the various architectural techniques and methods, the analysis of architectural qualities, models of representation of architectural templates and styles, their formalization, validation and testing and finally the engineering approach in which these consistent and autonomous elements can be tackled.

With blue, green, and gold foliage and shapes ranging from spiky to weeping, conifers have the potential to be garden design stars. But they are commonly misused in gardens and landscapes, leading to looming spruces squashed against a house or rows of kettledrum-shaped yews along a sidewalk. When used

correctly and creatively, conifers can be star players in creating beautiful, long-lasting plant combinations or serene backyard havens. Designing with Conifers shows readers exactly how to choose the best conifers for specific needs. Chapters cover shape, color, and conifers for specific sites and conditions, including front gardens, hedges and screens, topiary, dwarf conifers, shade gardens, Asian-style gardens, bonsai, and miniature railroad gardens. Also includes useful appendices that list of conifers for various problems and conditions, like conifers for areas plagued by deer and the best conifers for Christmas trees and Southern gardens. Each section is enlivened with gorgeous color photographs. Whatever landscape situation or challenge a gardener designer faces, Designing with Conifers shows how to make the best choice from this beautiful, useful, and versatile group of plants.

A counterintelligence expert shows readers how to use trust to achieve anything in business and in life.

Robin Dreeke is a 28-year veteran of federal service, including the United States Naval Academy, United States Marine Corps. He served most recently as a senior agent in the FBI, with 20 years of experience. He was, until recently, the head of the Counterintelligence

Behavioral Analysis Program, where his primary mission was to thwart the efforts of foreign spies, and to recruit American spies. His core approach in this mission was to inspire reasonable, well-founded trust among people who could provide valuable information. The Code of Trust is based on the system Dreeke devised, tested, and implemented during years of field work at the highest levels of national security. Applying his system first to himself, he rose up through federal law enforcement, and then taught his system to law enforcement and military officials throughout the country, and later to private sector clients. The Code of Trust has since elevated executives to leadership, and changed the culture of entire companies, making them happier and more productive, as morale soared. Inspiring trust is not a trick, nor is it an arcane art. It ' s an important, character-building endeavor that requires only a sincere desire to be helpful and sensitive, and the ambition to be more successful at work and at home. The Code of Trust is based on 5 simple principles: 1) Suspend Your Ego 2) Be Nonjudgmental 3) Honor Reason 4) Validate Others 5) Be Generous To be successful with this system, a reader needs only the willingness to spend eight to ten hours learning a method of trust-building that took Robin Dreeke almost a lifetime to create.

We revisit Lipset 's law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

**Neuropsychologist Offers Hope to Those Struggling with Depression** As a board-certified neuropsychologist, Dr. Michelle Bengtson sees the devastation of depression. Early on, she practiced the most effective treatments and prescribed them for her clients. But when she experienced depression herself, she found that the treatments she had recommended were lacking. Her experience showed her the missing component in treating depression. In *Hope Prevails*, Dr. Bengtson writes with deep compassion, blending her training and faith, to offer readers a hope grounded in God's love and grace. She helps readers understand what depression is, how it affects them spiritually, and what, by God's grace, it cannot do. The result is an approach that offers the hope of release, not just the management of symptoms. For those who struggle with depression and those who want to help them, *Hope Prevails* offers hope for the future.
