Songs of Social Protest is a comprehensive, cutting-edge companion guide to music and social protest globally. Bringing together established and emerging scholars from a range of fields, it explores a wide range of examples of, and contexts for, songs and their performance that have been deployed as part of local, regional and global social protest movements.

[A View of Berg's Lulu Through the Autograph Sources](#) Oxford University Press

Music and Music Education as Social Praxis is a brief introduction to a praxial theory of music education, defined by author. It is grounded in an interdisciplinary approach, for undergraduate and graduate students in music education. Drawing upon scholarship from a range of disciplines, including philosophy and sociology, the book emphasizes and highlights thinking of music as an active social practice and offers an alternative to existing approaches to music education. This text advocates for an alternative approach to teaching music, rooted in the social practice of music, and will supplement Foundations or Methods courses in the Music Education curriculum.

Songs of Social Protest Oxford University Press

"Hall was the first to study this material whole and in such depth; the result of her study remains an important, and in many ways path-

breaking, piece of work."--Douglas Jarman, author of The Music of Alban Berg

The Oxford Handbook of Music Education, Volume 2

"The conversation between music and theology, dormant for too long in recent years, is at last gathering pace. And rightly so. There will always be theologians who will regard music as a somewhat peripheral concern, too trivial to trouble the serious scholar, and in any case almost impossible to engage because of its notorious resistance to words and concepts. But an increasing number are discovering again what many of our forbears realized centuries ago, that the kinship between this pervasive feature of human life and the search for a Christian 'intelligence of faith' is intimate and ineradicable. Maeve

Heaney's ambitious, wide-ranging, and energetic book pushes the conversation further forward still. Her approach is unapologetically theological, grounded in the passions and concerns of mainstream doctrinal theology. And yet she is insisting . . . that music must be given its due place in the ecology of theology. Although convinced that music should not be set up as a rival to linguistic or conceptual articulation, let alone swallow up 'traditional' modes of theological language and thought, she is equally convinced that music is an irreducible means of coming to terms with the world, a unique vehicle of world-disclosure, and as such, can generate a particular form of 'understanding': 'there are things which God may only be saying through music.' If this is so, it is incumbent on the theologian to listen." --Jeremy Begbie, from the Foreword

The Oxford Handbook of Music Education, Volume 2 Wipf and Stock Publishers

This work offers students a complete overview of key writings on music education, from the ancient Greeks to contemporary American thought, with emphasis on writings from the last 100 years. Designed to complement the standard music pedagogy course, the selections range from Plato's Republic through William Billings' writings on Colonial American Music Education through the 2001 advocacy for music education. In five sections, each part of the book is introduced by a brief essay giving an overview of the material covered and information placing it within the critical context of its day. Individual articles are also prefaced with informative headnotes.

iconographies, critical commentaries to complete works, ethnographic recordings, conference proceedings, electronic resources, and reviews.

Exploring the Process of Musical Creativity amongst Indigenous Cosmopolitan Musicians (ICMs) for Mission Research & Education Association

"Source: Music of the Avant-garde, 1966-1973 brings its extraordinary, historical explorations and experimentations to a new audience of contemporary music devotees, researchers, composers, students, and educators. This welcome volume reproduces Source's original, provocative issues in an unparalleled repository of articles, scores, graphics, photos, editorials, and reviews, featuring contributions by some of the 20th century's leading experimental and pioneering composers and performers. Larry Austin and Douglas Kahn have provided us with a true gem and an invaluable resource for future study." —Elainie Lillios, Associate Professor of Composition at Bowling Green State University "Source was an audacious piece of new music entrepreneurship that could only have happened in the 1960s. I well recall discovering it in the stacks at the university library, flipping the pages and learning that you could just jump right off the edge of the known musical world. This was not a journal that provided information or mere perspectives on new music: it showed you the music itself. It brought you into direct contact with the excitement, provocation, beauty, audacity, ingenuity, and insight of the leading experimental musicians of the day. You might be offended, intrigued, inspired, amused, baffled, but the point was that you were right in there, seeing what was going on and deciding for yourself what you wanted to make out of it. How wonderful it is for this liberating historical moment to be reincarnated; who knows what musical adventures this re-publication will inspire." —James Pritchett, author of *The Music of John Cage* "This long awaited reissue of important documents from the late 1960s, including graphic scores, essays, and

articles, is an indispensable anthology of cross-disciplinary ideas about music and composition. This is a fascinating treasure trove of musical counterculture, absolutely relevant today." —Christian Marclay, visual artist and composer "Source was an essential document of its time, a music magazine that made beautiful music—and beautiful art. This was one of the reasons why I was delighted to be able to reissue all the recordings on a three CD set on Pogus. This book now puts all the print issues in one's hand, bringing us as close to having Source again as we are ever likely to get." —Al Margolis, Pogus Productions (www.pogus.com) "There was a glorious moment at the cusp of the 1970s when all our musical road maps became obsolete overnight. Young composers relied instead on the accounts of voyageurs, many of which were printed in the pages of Source. Austin and Kahn's meticulous compendium carries us back to that heady, pre-Web time when anything seemed possible." —Nicolas Collins, Editor-in-Chief, *Leonardo Music Journal*

Multiple Subjects (5001) John Wiley & Sons

General music is informed by a variety of teaching approaches and methods. These pedagogical frameworks guide teachers in planning and implementing instruction. Established approaches to teaching general music must be understood, critically examined, and possibly re-imagined for their potential in school and community music education programs. *Teaching General Music* brings together the top scholars and practitioners in general music education to create a panoramic view of general music pedagogy and to provide critical lenses through which to view these frameworks. The collection includes an examination of the most prevalent approaches to teaching general music, including Dalcroze, Informal Learning, Interdisciplinary, Kodály, Music Learning Theory, Orff Schulwerk, Social Constructivism, and World Music Pedagogy. In addition, it provides critical analyses of general music and teaching systems, in light of the ways children around the world experience music in their lives. Rather than promoting or advocating for any single approach to

teaching music, this book presents the various approaches in conversation with one another. Highlighting the perceived and documented benefits, limits, challenges, and potentials of each, Teaching General Music offers myriad lenses through which to re-read, re-think, and re-practice these approaches.

Praxis II Middle School Mathematics (5169) With Online Practice Tests Routledge

Music Technology in Education lays out the principles of music technology and how they can be used to enhance musical teaching and learning in primary and secondary education. Previously published as Computers in Music Education, this second edition has been streamlined to focus on the needs of today's music education student. It has been completely updated to reflect mobile technologies, social networks, rich media environments, and other technological advances. Topics include: Basic audio concepts and recording techniques Enhanced music instruction with interactive systems, web-based media platforms, social networking, and musicianship software Administration and management of technology resources Distance education and flexible learning Music Technology in Education provides a strong theoretical and philosophical framework for examining the use of technology in music education while outlining the tools and techniques for implementation in the classroom. Reflective Questions, Teaching Tips, and Suggested Tasks link technology with effective teaching practice. The companion website provides resources for deeper investigation into the topics covered in each chapter, and includes an annotated bibliography, website links, tutorials, and model projects.
