Empty Nets is a disturbing history of broken promises and justice delayed. It chronicles a native people's fight to maintain their livelihood and culture in the face of an indifferent federal bureaucracy and hostile state governments. In 1939, the U.S. Government promised to provide Columbia River Indians with replacements for traditional fishing sites flooded in the backwater of the Bonneville Dam. Roberta Ulrich recounts the Indians' sixty-year struggle, in the courts and on the river, to persuade the government to keep its promise. From the beginning, the battle was intertwined with the tribes' larger effort to assert treaty-guaranteed fishing rights. Ulrich deftly examines a host of other issues--including declining salmon runs, industrial development, tribal self-government, and recreation--that became enmeshed in the tribes' pursuit of justice. Her broad and incisive account ranges from descriptions of the dam's disastrous effects on a salmon-dependent culture to portraits of the plights of individual Indian families. Descendants of those to whom the promise was made and activists who have spent their lives working to acquire the sites reveal the

remarkable patience and resilience of the Columbia River Indians. In a new epilogue, Ulrich updates the story of the treaty fishing sites-- now all nearly completed--and describes political and cultural developments since 1999, including a major new component: the planned reconstruction of the Celilo Indian Village. And yet despite the everchanging circumstances surrounding the treaty sites, the tribes' objective remains the same. In the words of Donald Sampson, former executive director of the Columbia River InterTribal Fish Commission, "Our people's desire is simple--to preserve the fish, to preserve our way of life, now and for future generations."

At age sixty-seven, Colin Fletcher, the guru of backpacking in America, undertook a rigorous six-month raft expedition down the full length of the Colorado River--alone. He needed "something to pare the fat off my soul...to make me grateful, again, for being alive." The 1,700 miles between the Colorado's source in Wyoming and its conclusion at Mexico's Gulf of

California contain some of the most spectacular vistas on earth, and Fletcher is the ideal guide for the terrain. As his privileged companions, we travel to places like Disaster Falls and Desolation Canyon, observe beaver and elk, experience sandstorms and whitewater rapids, and share Fletcher's thoughts on the human race, the environment, and the joys of solitude.

The Great Lakes are the largest collection of fresh surface water on earth, and more than 40 million Americans and Canadians live in their basin. Will we divert water from the Great Lakes, causing them to end up like Central Asia's Aral Sea, which has lost 90 percent of its surface area and 75 percent of its volume since 1960? Or will we come to see that unregulated water withdrawals are ultimately catastrophic? Peter Annin writes a

fast-paced account of the people and stories behind these upcoming battles. Destined to be the definitive story for the general public as well as policymakers, *The Great Lakes Water Wars* is a balanced, comprehensive look behind the scenes at the conflicts and compromises that are the past-and future-of this unique resource.

The classic novel of fly fishing and spirituality republished with a new Afterword by the author. Since its publication in 1983, *The River Why* has become a classic. David James Duncan's sweeping novel is a coming-of-age comedy about love, nature, and the quest for self-discovery, written in a voice as distinct and powerful as any in American letters. Gus Orviston is a young fly fisherman who leaves behind his comically schizoid family to find his own path. Taking refuge in a remote cabin, he sets out in pursuit of the Pacific Northwest's elusive steelhead. But what begins as a

physical quarry becomes a spiritual one as his quest for self-knowledge batters him with unforeseeable experiences. Profoundly reflective about our connection to nature and to one another, *The River Why* is also a comedic rollercoaster. Like Gus, the reader emerges utterly changed, stripped bare by the journey Duncan so expertly navigates.

*Cultural Resources Report*

This volume of the Collections of the Minnesota Historical Society is devoted to a historical discussion by Jacob Vredenberg Brower (1844-1905) about the source and headwaters of the Mississippi River, combined with his extensive hydrographic and topographic surveys. Brower summarizes the major European and white American exploratory trips to the area. Based on a scientific survey of the Itasca Basin that he made under the authority of the Minnesota Historical Society, Brower concludes that the true source of the Mississippi is neither Itasca Lake nor Elk Lake, nor even the stream discovered by Jean N. Nicolet (1836) called "Nicolet's Infant Mississippi River," but the "Greater Ultimate Reservoir" which receives its water supply from aerial precipitation and stores it in various component lakes and springs. Some of these lakes include Hernando de Soto, the Triplets, Whipple, Morrison, and Floating Moss; the streams that proceed from them include the beginnings of the Nicolet as well as the Mississippi. From Nicolet's middle lake the main river proceeds "in an unbroken channel" to the

Gulf. After lobbying successfully to have this headwater region preserved as Itasca State Park (1891), Brower served as its first commissioner. The appendix includes an historical account of how the Mississippi and the Lake of the Woods came to form part of the northwestern boundary of the United States. Its author was Albert James Hill (1823-1895), who was also instrumental in the creation of Brower's report.

Water Problems Facing the Lower Colorado River Area

In this true story of adventure, author Jack Nisbet re-creates the life and times of David Thompson—fur trader, explorer, surveyor, and mapmaker. From 1784 to 1812, Thompson explored western North America, and his field journals provide the earliest written accounts of the natural history and indigenous cultures of the what is now British Columbia, Alberta, Montana, Idaho, Washington, and Oregon. Thompson was the first person to chart the entire route of the Columbia river, and his wilderness expeditions have become the stuff of legend. Jack Nisbet tracks the explorer across the content, interweaving his own observations with Thompson's historical writings. The result is a fascinating story of two men discovering the Northwest territory almost two hundred years apart.

### **A STUDY OF THE SAK? HISTORY**

How can you know a place? Historian and naturalist Jack Nisbet—author of *Sources of the River: Tracking David Thompson Across Western North America*—looks to the relics of a region to connect the present moment to the distant past. In the vast Western territory defined by the Columbia River, Nisbet tracks the stories and meaning of relics such as a trilobite fossil that points to a tropical prehistoric ecology; the nearly extinct California condor, once the largest thing in the skies, described with amazement by Meriwether Lewis; the indelible stain of the smallpox pandemic that overcame the native peoples of the West; a rare and socially potent strain of indigenous wild tobacco that reveals the presence of vestigial Indian practices; and the remains of one Jaco Finlay, a mixed-blood trapper and scout who seems to have been everywhere in the region two hundred years ago. All of these relics are the visible bones that show how past is present in the Columbia River Country. Together the stories these bones tell lays out a wholly original, hybrid

history that connects nature with human endeavor, geography with the passage of time—all contribute to the biography of a place. The arrow of time travels in one direction, and this is usually how history is told: beginning to end. But Jack Nisbet is up to something else: journeys across time through a place, knitting past to present and back again to assemble a portrait of the land that marked the culmination of Lewis & Clark's expedition, that saw the sad end of the Indian Wars with the flight of Chief Joseph, that has offered up fossil proof of mammoth species long extinct. In this western territory, the storied past is much in evidence.
