Originally published in 1985, *New Nationalisms in the Developed West* is a collection of interdisciplinary and insightful essays on modern nationalist movements. The book argues that these movements have challenged the power of Western nation-states not from without, but from within their frontiers. The book's focus remains predominately on Western societies and the nationalist movements of nations against states. The essays in this book are detailed and innovative and analyse nationalism through theory, methodology and empirical evidence. The book's use of research methods deepens the comparative explanation of nationalist movements, and advances understanding of Western nationalisms as social movements and examples of social change in the developed world. This book will appeal to social scientists, in political science and sociology.
