The Washington Post Notable Non-Fiction of 2013 "I can imagine few more enjoyable ways of thinking than to read this book."—Sarah Bakewell, New York Times Book Review, front-page review Tackling the

"darkest question in writers, "testing all of philosophy" the contentions of with "raffish erudition" (Dwight Garner, New York Times), author Jim Holt explores the greatest metaphysical mystery of all: why is there something rather than nothing? This runaway bestseller, which has captured the imagination of critics and the public alike, traces our latest efforts to grasp the origins of the universe. Holt adopts the role of cosmological detective, traveling the globe to interview a host of celebrated scientists, philosophers, and the contentions of one against the theories of the other" (Jeremy Bernstein, Wall Street Journal). As he interrogates his list of ontological culprits, the brilliant yet slyly humorous Holt contends that we might have been too narrow in limiting our suspects to God versus the Big Bang. This "deft and consuming" (David Ulin, Los Angeles Times) narrative humanizes the profound questions of meaning and existence it confronts.

Timothy is on probation. It's a strange word—something that happens to other kids, to delinquents, not to kids like him. And yet, he is under house arrest for the next year. He must check in weekly with a probation officer and a therapist, and keep a journal for an entire year. And mostly, he has to stay out of trouble. But when he must take drastic measures to help his struggling family, staying out of trouble proves more difficult than Timothy ever thought it would be. By turns touching and funny, and always original, *House Arrest* is a middlegrade novel in verse about one boy's path to redemption as he navigates life with a sick brother, a grieving mother, and one tough probation officer.

their children? These six stories by horror novelist Robert Holt answers that question. Wrapped in morals, they will make kids laugh, cry, and maybe even shiver. These stories are great for children and the grownups that read to them. They will stimulate dialogue of more important issues and lead to character building conversations. From one of the world ' s leading neuroscientists: a succinct, illuminating, wholly engaging investigation of how biology, neuroscience, psychology, and artificial intelligence have given us the tools to unlock the mysteries of human consciousness “ One thrilling insight after another ... Damasio has succeeded brilliantly in narrowing the gap between body and mind. ” —The New York Times Book Review
In recent decades, many philosophers and cognitive scientists have declared the problem of

consciousness
unsolvable, but Antonio
Damasio is convinced
that recent findings
across multiple
scientific disciplines
have given us a way to
understand
consciousness and its
significance for human
life. In the forty-eight
brief chapters of
Feeling & Knowing, and
in writing that remains
faithful to our intuitive
sense of what feeling
and experiencing are
about, Damasio helps us
understand why being
conscious is not the
same as sensing, why
nervous systems are
essential for the
development of
feelings, and why
feeling opens the way
to consciousness writ
large. He combines the
latest discoveries in
various sciences with
philosophy and
discusses his original
research, which has
transformed our
understanding of the
brain and human
behavior. Here is an
indispensable guide to
understanding how we
experience the world
within and around us
and find our place in the

universe.
