Is there life after capitalism? In this creatively argued follow-up to their book *The End of Capitalism (As We Knew It)*, J. K. Gibson-Graham offer already existing alternatives to a global capitalist order and outline strategies for building alternative economies. *A Postcapitalist Politics* reveals a prolific landscape of economic diversity—one that is not exclusively or predominantly capitalist—and examines the challenges and successes of alternative economic interventions. Gibson-Graham bring together political economy, feminist poststructuralism, and economic activism to foreground the ethical decisions, as opposed to structural imperatives, that construct economic “development” pathways. Marshalling empirical evidence from local economic projects and action research in the United States, Australia, and Asia, they produce a distinctive political imaginary with three intersecting moments: a politics of language, of the subject, and of collective action. In the face of an almost universal sense of surrender to capitalist globalization, this book demonstrates that postcapitalist subjects, economies, and communities can be fostered. The authors describe a politics of possibility that can build different economies in place and over space. They urge us to confront the forces that stand in the way of economic experimentation and to explore different ways of moving from theory to action. J. K. Gibson-Graham is the pen name of Katherine Gibson and Julie Graham, feminist economic geographers who work, respectively, at the Australian National University in Canberra and the University of Massachusetts Amherst.

"The invention of new modes of sensibility is vital to enriching and sustaining political engagements, labours and lives in the situated contexts of urban collectivity. The nanopolitics handbook investigates the neoliberal city and workplace, the politics of crisis and austerity, precarious lives and modes of collaboration - through bodies and their encounters. Starting from the exploration of what bodies can do - with curiosity, courage and care - nanopolitics is a proposal for producing new collective subjectivities. Based on the experiments and experiences of the nanopolitics group, this book proposes exercises, concepts and ideas as little maps and machines for action. Drawing on social movements, grassroots organizing, dance, theatre and bodywork, the reflections and practices here present strategies for navigating and reconfiguring the playing field of 'nanopolitics', activating its entanglement with the major politics of our time"--Publisher's description

According to International Educational Statistics (2008), there are total of 654.9 million school-age children in the world. If dyslexia affects 10–15% of these youth (Fletcher et al. 2007), this translates to approximately 65–98 million students with difficulties in reading and writing. The EU strategic plan for education (2010) recognises the need for EU citizens to speak a foreign language. As such, foreign language courses are introduced on an obligatory basis at the primary level of education. Dyslexic students are not exempt from this regulation, and, thus, are confronted with different language systems that must be mastered. The difficulty here escalates if the systems differ significantly in their levels of orthographic transparency. Reading and writing are operationalised by the same biological functions that are defined by the universal perspective. However, language systems differ in terms of their transparency; for example, English and French are considered opaque scripts, whereas Spanish and Italian are described as transparent orthographies. These differences are discussed in this book as part of the language specific perspective, which can, in turn, raise questions such as: “Is a dyslexic student equally impaired in any language they study?” and “Is the type of difficulty primarily dependent on the language system or is it rather a dyslexia syndrome?” This volume provides answers through a synthesis of research on reading difficulties in first and foreign languages and existing taxonomies of dyslexia sub-types.

The ancient Toltecs believed that life as we perceive it is a dream. We each live in our own personal dream, and all of our dreams come together to make the Dream of the Planet. Problems arise when we forget that the dream is just a dream and fall victim to believing that we have no control over it. "The Mastery of Self" takes the Toltec philosophy of the Dream of the Planet and the personal dream and explains how a person can: Wake up Liberate themselves from illusory beliefs and stories Live with authenticity Once released, we can live as our true, authentic, loving self, not only in solitude and meditation, but in any place--at the grocery store, stuck in traffic, etc.--and in any situation or scenario that confronts us. Peer learning allows a positive use of differences between pupils, turning them into learning opportunities. Yet education professionals often remain unfamiliar with the principles necessary to guarantee its effectiveness. The aim of this book is to help practitioners establish well-structured and effective peer learning projects using a variety of methods. It introduces and defines cooperative learning (mutual peer interaction) and peer tutoring (directional peer interaction) – outlining general organisational principles that will help practitioners implement peer learning in either of these forms. The authors consider how to prepare and train learners to undertake their roles effectively, and how to organise and monitor the process of interaction as it is happening. They then look at how these systems actually operate in the classroom, exploring how the organisational principles work in practice and giving many practical examples. Subsequently three successive chapters consider how to structure peer interactions in cooperative learning, same-age peer tutoring and cross-age peer tutoring. Finally, the advantages and problems, and the potential and challenges, of peer learning are examined. The book should be read in stages, with each part being able to be read on its own – thus providing time for reflection. Within each part, readers can choose to focus on cooperative learning or peer tutoring. The successive focuses on definitions, general principles of implementation and practical issues of implementation should help practitioners build their skills and confidence. Many choices between methods are described, and when teachers are confident in one method they may then consider trying a new method. It is the authors' hope that the book will become a model for peer learning by sharing with readers the skills of other practitioners, and thereby helping all children to develop to their full potential.
