For some five hundred years, Hebrew books have been counted among the treasures of the University of Cambridge, and Cambridge University Library's current holdings of Hebrew manuscripts (excluding most of the 140,000 fragments in its Genizah collections) are in excess of a thousand items. A wide range of Hebrew literature is represented, with substantial numbers in Bible, Bible Versions and Commentaries,

Talmud, Halakhah, Liturgy, Science, Poetry, Philosophy and Kabbalah. The bulk of the material is late mediaeval but there are also earlier items, among them the famous Nash Papyrus from the second pre-Christian century. Although this collection is among the world's most important, attempts, beginning in the mid-Victorian period, to describe it in detail, and to publish the results, have never met with success. In this volume, Stefan Reif, assisted by Shulamit Reif, has attempted to set the situation right by providing careful descriptions that will guide researchers in codicological matters and will alert them to data of special scholarly significance, without overwhelming

them with the kind of prolix treatment that characterised manuscript study in the nineteenth century. The volume has benefited not only from local Cambridge expertise but also from world-wide scholarly co-operation and includes many references to recent publications, as well as a representative selection of photographed folios. There are essays on the history of Hebraists and Hebraic at Cambridge that will interest historians, as well as extensive indexes that will provide easy access to the rich and varied contents of the descriptions. investigates ideological and hegemonic practices in globally and locally written English as a Foreign Language (EFL) textbooks, and explores whether these textbooks reflect the values, beliefs and norms of the native-speaker society by examining their ideological components and the hegemonic practices by means of which the source society or state seeks to influence learners of the language. It also attempts to clarify EFL teachers' and students' views on the underlying ideology and hegemonic practices in globally and locally written EFL textbooks. Studies on the relationship between ideology, hegemony and textbooks in

applied linguistics have become more prevalent in recent decades, as the emergence of critical theory, critical pedagogy, and critical thinking skills from the 1920s onwards has led scholars to adopt a more critical perspective towards EFL textbooks, especially with regard to elements of ideology and hegemony. These two terms encompass a plethora of components, ranging from nationalism to religion. At the same time, the importance of metanarratives originating from the tenets of modernism has declined from the 1960s onwards, the assumption being that the world has entered a new age called postmodernism and post-structuralism that emphasizes the role of

individuals and rejects efforts to reinforce post-colonialism, the effects of which can be seen in EFL textbooks.

Accordingly, taking the elements of ideology and hegemony into account remains a vital aspect in the analysis of EFL textbooks.

Pursuing an innovative, global approach, this unique book provides an updated review of the geology of Iberia and its continental margins from a geodynamic perspective. Owing to its location close to successive plate

margins, Iberia has played a pivotal role in the geodynamic evolution of the Gondwanan, Rheic, Pangea, Tethys and Eurasian plates over the last 600 Ma of Earth ' s history. The geological record starts with the amalgamation of Gondwana in the Neoproterozoic, which was succeeded by the rifting and spreading of the Rheic ocean; its demise, which led to the amalgamation of Pangea in the late Paleozoic; the rifting and spreading of several arms of the

Neotethys ocean in the Mesozoic Era and their ongoing closure, which was responsible for the Alpine orogeny.

The significant advances in the last 20 years have increasingly attracted international interest in exploring the geology of the Iberian Peninsula.

This volume focuses on the Cenozoic basins of the Iberian Geology and consequently the most recent sedimentary features in the Iberian Geology apart of the active ones. In this book, you will find a detailed

explanation of the alpine foreland basins, the extension of the west Mediterranean as well as the latest magmatism in Iberia.
