After a lifetime of writing and editing prose, Jacques Barzun has set down his view of the best ways to improve one's style. His discussions of diction, syntax, tone, meaning, composition, and revision guide the reader through the

technique of making the written word clear and agreeable to read. Exercises, model passages both literary and casual, and hundreds of amusing examples of usage gone wrong show how to choose the right path to self-expression in forceful and distinctive words.

The American Psychiatric Association Foundation has produced two new resources to help faith leaders better understand mental illness and treatment, and

better help individuals and families in their congregations facing mental health challenges, *Mental Health: A Guide for Faith Leaders* and a companion two-page Quick Reference on Mental Health for Faith Leaders. These resources are the culmination of work from the Mental Health and Faith Community Partnership, a collaboration of psychiatrists and faith leaders representing diverse faith traditions. Many people facing a mental health challenge, personally or with a family member, turn first to a faith leader. And for many receiving psychiatric care, religion and spirituality are an important part of healing. In their role as "first responders," faith leaders can help dispel misunderstandings, reduce stigma associated with mental illness and treatment, and help access to treatment for those in need. The Guide and Quick Reference provide faith leaders with the knowledge, tools and resources to support that role. The Guide includes a general overview of mental health and mental illness and information on how faith leaders can support people with mental health challenges. For example, it discusses how to create a more inclusive and welcoming community, when and how to make a referral to professional mental health services, and ways to deal with resistance to accepting mental health treatment. The one page Quick Reference Guide is included.

If the twentieth century was only focused on the complementarity and the opposition of market and state,

the twenty-first century has now to deal with the prominence of the third sector, the emergence of social enterprises and other solidarity hybrid forms. The concept of civil society organisations (CSOs) spans this diversity and addresses this new complexity. The first part of the book highlights the organizational dimensions of CSOs and analyses the growing role of management models and their limits. Too often, the study of CSO governance has been centered on the role of the board and has not sufficiently taken into account the different types of accountability environments. Thus, the conversation about CSO governance rises to the level of networks rather than simple organizations per se, and the role of these networks in setting the agenda in a democratic society. In this perspective, the second part emphasizes the institutional dimensions of CSO governance by opening new avenues on democracy. First, the work of Ostrom about governing the commons provides us new insights to think community self-governance. Second, the work of Habermas and Fraser opens the question of deliberative governance and the role of public sphere to enlarge our vision of CSO governance. Third, the concepts of substantive rationality and economy proposed respectively by Ramos and Polanyi reframe the context in which the question can be addressed. Lastly, this book argues for a stronger intercultural approach useful for the renewal of paradigms in CSOs research. This book has for objective to present a unique collective work in bringing together 33 authors coming from 11 countries to share perspectives on civil society governance and will be of interest to an

Far from being rhetorical ornaments, metaphors play a central role in public discourse, as they shape the structure of political categorisation and argumentation. Drawing on a very large bilingual corpus, this book, now in paperback, analyses the distribution of 'metaphor scenarios' in more than a decade of public discourse on European integration, elucidating differences in UK and German attitudes and argumentation. The corpus analysis leads to a refinement of cognitive metaphor theory by systematically relating conceptual, semantic and argumentation levels and incorporating the historical dimension of metaphor evolution. Finally, drawing on examples of metaphor negotiation and on a reassessment of Hobbes' concept of metaphor in Leviathan, the book highlights the ethical dimension of metaphor in politics.
