independent learning and research skills · Provide the content for generating individual revision notes
GCSE Resistant Materials Technology Springer
AS Critical Thinking for AQA is the definitive textbook for students of the current AQA Advanced Subsidiary Level syllabus. Structured very closely around the AQA specification, it covers the two units of the AS level in an exceptionally clear and student-friendly style. The chapters are helpfully subdivided into short digestible passages, and include: intended learning objectives at the beginning of each chapter student exercises at the end of each section with a 'stretching activity' for more advanced learners exam orientated questions key point summaries at the end of each section cross references. In line with the AQA specification, there is a heavy emphasis on more imaginative forms of source material, for example, music, film, artwork, historical documents, adverts, moral dilemmas and scientific debates, as a means of illustrating key points. A great deal of emphasis is also placed on 'live' or 'real' arguments, taking topical examples from the world of science, politics, entertainment and sport. The book is accompanied by a companion website with extensive resources for both instructors and students.
CCEA AS/A2 Unit 3 Biology Student Guide: Practical Skills in Biology Heinemann

CCEA A-level Year 2 Physics Student Guide 4: A2 Nelson Thornes
Engineering Education has emerged as a fast developing 'discipline' in itself with universities across the world opening up exclusive 'Departments of Engineering Education' which is also impacting the socio-economic system in India. Most of the engineering institutions in India are part of the 'hub-and-spoke' university education system unique to India. Scientifically developing the 'Outcome-based Curriculum' (OBC) uniformly across India has been a daunting task, due to the dearth of an authentic book on OBC addressing the need of the

Indian Engineering Education System. This being the first book of its kind in India and with OBC serving as the 'Constitution' of 'Outcome-based Education' (OBE), it will go a long way to address this need. The unique feature of this book is that it is replete with examples to explain the various concepts of planning, designing and implementing the OBC in engineering institutions. Different aspects of Outcome-based Teaching Learning (OBTL) and Outcome-based Assessment (OBA) are also discussed vividly. Apart from the examples weaved into the lucidly written seven chapters, additional examples and important formats are provided in the 'Annexures'; another unique feature of this book. Every engineering UG, PG, or Diploma teacher would be happy to possess a personal copy of this book for 24x7 access which will help to clear their doubts as it arises then and there.

Makers What the reviewers' say

"The technical education has to adopt Outcome-Based

Curriculum and there was a dire

need of authentic literature

which would serve as a base

document for scientifically

developing OBC. The book

reflects the expertise of both the

authors who have more than 30 years of experience in industry and academics in designing and implementing different variants of OBC for various technical education programmes. Such a book will serve as a reference for future generations to avoid 're-inventing the wheel again and again.'" —Dr. M.P. Poonia, Vice-Chairman, AICTE "National Institute of Technical Teacher Training and Research (NITTTR) Bhopal has been spearheading different forms of OBC for the last five decades in which the authors have contributed substantially. Care has been taken such that this book will not only benefit the Indian engineering education system, but also the engineering teaching fraternity at the international context."—Dr. C. Thangaraj, Director, NITTTR Bhopal
