Concepts from Tensor Analysis and Differential Geometry discusses coordinate manifolds, scalars, vectors, and tensors. The book explains some interesting formal properties of a skew-symmetric tensor and the curl of a vector in a coordinate manifold of three dimensions. It also explains Riemann spaces, affinely connected spaces, normal coordinates, and the general theory of extension. The book explores differential invariants, transformation groups, Euclidean metric space, and the Frenet formulae. The text describes curves in space, surfaces in space, mixed surfaces, space tensors, including the formulae of Gauss and Weingarten. It presents the equations of two scalars K and Q which can be defined over a regular surface S in a three dimensional Riemannian space R. In the equation, the scalar K, which is an intrinsic differential invariant of the surface S, is known as the total or Gaussian curvature and the scalar U is the mean curvature of the surface. The book also tackles families of parallel surfaces, developable surfaces, asymptotic lines, and orthogonal ennuples. The text is intended for a one-semester course for graduate students of pure mathematics, of applied mathematics covering subjects such as the theory of relativity, fluid mechanics, elasticity, and plasticity theory. Love One and Hate the Other is a fictional memoir about the life of a young man who grows up inside the predominant culture war in the state of Alabama. That war is based on the Auburn-Alabama college football rivalry, and it shapes and affects every facet of life, from love to vocational choices. While the American obsession with college football provides an important framework for the story, this is more than a football tale. The author details Alabamians' extravagant cultural obsession through the eyes of protagonist Joe Billy Thompson as he recounts a memorable cast of characters: Uncle Moon Pie, the bigger-than-life quintessential Auburn fan; Old Man Parker, a 1932 graduate of Alabama; Jobab Robinson, the other-worldly high school football talent; Joe Billy's gorgeous junior high love, Betty Jean Asher; and, the Bama tailgate party crowd gathered at Miss Truby's in the theater district in New York. Importantly, Joe Billy's memoir documents the prevalent thread of institutional and cultural racism during the time-frame of the narrative. Also, while many books document the South's obsession

with football, this story uses football to frame ventures into love, romance, weddings, funerals, church services, and betting gains and losses.

Our societies obviously rest on common beliefs. These "myths" are tools that help us to develop and build common identities; they form the structure around which societies function. This does not imply that these beliefs are "true," in the sense that they would be supported by empirical facts. In social matters, myths have undoubtedly important functions to play even if no empirical facts support them. On the other hand, and precisely because they are not discussed, myths may be problematic: they may create illusions, conserve structures that are inefficient and unable to improve the situation of citizens. This is particularly true with constitutions. Constitutions are very important for societies: a constitution is a

document — even in societies based on “unwritten” constitutions — which binds citizens together, creating unity among them, and which forms the framework within which our activities take place. As Nobel Prize laureate James Buchanan used to say: constitutions contain the rules of the social game we play in our everyday life. However, constitutions are not frequently debated by citizens. This is why we end up with common beliefs about these constitutions: they are above our heads, around us. We take them, their role, function, and nature as given. The purpose of this volume to investigate and challenge common constitutional myths. Featuring contributions from prominent economists, political scientists, and legal scholars, the chapters in this volume address such myths as “constitutions are binding social contracts,” “constitutions are economic documents” and “constitutions are legal documents.” Illustrating their analyses with historical and contemporary examples from the United States, Canada, and Europe, the authors build a multi-layered approach to understanding constitutions and their implications for social and political influence.

'De Bernieres is a singular, cherishable voice' Mail on Sunday From the master of historical fiction, this book follows an unforgettable family after the Second World War. Some bonds are hard to break... Daniel Pitt was an RAF fighter in the First World War and an espionage agent for the SOE in the Second. Now the conflicts he faces are closer to home. Daniel's marriage has fractured beyond repair and Daniel's relationship with his son, Bertie, has been a failure since Bertie was a small boy. But after his brother Archie's death, Daniel is keen for new perspectives. He first travels to Peshawar to bury Archie in the place he loved best, and then finds himself in Canada, avoiding his family and friends back in England. Daniel and Bertie's different experiences of war, although devastating, also bring with them the opportunity for the two to reconnect. If only they can find a way to move on from the past...

The introduction of endosonographically guided fine-needle biopsy has led to increasing use of longitudinal scans in the endosonographic diagnosis of tumors and other diseases of the upper gastrointestinal tract as well as of the pancreas. In this handbook, experts concentrate primarily on practical aspects of using endosonography with longitudinal scans. Examination techniques, interpretation of the ultrasound images, and normal anatomy with important guiding structures are demonstrated by means of 3D CT images and the corresponding endosonographic images. In addition, pathological endosonographic findings and the current status of diagnosis using fine-needle biopsy are described.

Ruth Boeker offers a new perspective on Locke ' s account of

persons and personal identity by considering it within the context of his broader philosophical project and the philosophical debates of his day. Emphasizing the importance of the moral and religious dimensions of his view, Boeker argues that, to take seriously Locke's general approach to questions of identity, we should consider his account of personhood separately from his account of personal identity over time. On this basis, she argues that Locke endorses a moral account of personhood, according to which persons are subjects of accountability, and that his particular thinking about moral accountability explains why he regards sameness of consciousness as necessary for personal identity over time. In contrast to some neo-Lockean views about personal identity, Boeker argues that Locke's account of personal identity is not psychological per se, but rather his underlying moral, religious, metaphysical, and epistemic background beliefs are relevant for understanding why he argues for a consciousness-based account of personal identity. Taking his underlying background beliefs into considerations not only sheds light on why many of his early critics do not adopt Locke's view, but also shows why his view cannot be as easily dismissed as some of his critics assume.

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.
