Concepts from Tensor Analysis and Differential Geometry discusses coordinate manifolds, scalars, vectors, and tensors. The book explains some interesting formal properties of a skew-symmetric tensor and the curl of a vector in a coordinate manifold of three dimensions. It also explains Riemann spaces, affinely connected spaces, normal coordinates, and the general theory of extension. The book explores differential invariants, transformation groups, Euclidean metric space, and the Frenet formulae. The text describes curves in space, surfaces in space, mixed surfaces, space tensors, including the formulae of Gauss and Weingarten. It presents the equations of two scalars K and Q which can be defined over a regular surface S in a three dimensional Riemannian space R. In the equation, the scalar K, which is an intrinsic differential invariant of the surface S, is known as the total or Gaussian curvature and the scalar U is the mean curvature of the surface. The book also tackles families of parallel surfaces, developable surfaces, asymptotic lines, and orthogonal ennuples. The text is intended for a one-semester course for graduate students of pure mathematics, of applied mathematics covering subjects such as the theory of relativity, fluid mechanics, elasticity, and plasticity theory.

The introduction of endosonographically guided fine-needle biopsy has led to increasing use of longitudinal scans in the endosonographic diagnosis of tumors and other diseases of the upper gastrointestinal tract as well as of the pancreas. In this handbook, experts concentrate primarily on practical aspects of using endosonography with longitudinal scans. Examination techniques, interpretation of the ultrasound images, and normal anatomy with important guiding structures are demonstrated by means of 3D CT images and the corresponding endosonographic images. In addition, pathological endosonographic findings and the current status of diagnosis using fine-needle biopsy are described.

Love One and Hate the Other is a fictional memoir about the life of a young man who grows up inside the predominant culture war in the state of Alabama. That war is based on the Auburn-Alabama college football rivalry, and it shapes and affects every facet of life, from love to vocational choices. While the American obsession with college football provides an important framework for the story, this is more than a football tale. The author details Alabamians' extravagant cultural obsession through the eyes of protagonist Joe Billy Thompson as he recounts a memorable cast of characters: Uncle Moon Pie, the bigger-than-life quintessential Auburn fan; Old Man Parker, a 1932 graduate of Alabama; Jobab Robinson, the other-worldly high school football talent; Joe Billy's gorgeous junior high love,

Betty Jean Asher; and, the Bama tailgate party crowd gathered at Miss Truby's in the theater district in New York. Importantly, Joe Billy's memoir documents the prevalent thread of institutional and cultural racism during the time-frame of the narrative. Also, while many books document the South's obsession with football, this story uses football to frame ventures into love, romance, weddings, funerals, church services, and betting gains and losses.
