Our societies obviously rest on common beliefs. These "myths" are tools that help us to develop and build common identities; they form the structure around which societies function. This does not imply that these beliefs are "true," in the sense that they would be supported by empirical facts. In social matters, myths have undoubtedly important functions to play even if no empirical facts support them. On the other hand, and precisely because they are not discussed, myths may be problematic: they may create illusions, conserve structures that are inefficient and unable to improve the situation of citizens. This is particularly true with constitutions. Constitutions are very important for societies: a constitution is a document – even in societies based on "unwritten" constitutions – which binds citizens together, creating unity among them, and which forms the framework within which our activities take place. As Nobel Prize laureate James Buchanan used to say: constitutions contain the rules of the social game we play in our everyday life. However, constitutions are not frequently debated by citizens. This is why we end up with common beliefs about these constitutions: they are above our heads, around us. We take them, their role, function, and nature as given. The purpose of this volume to investigate and challenge common constitutional myths. Featuring contributions from prominent economists, political scientists, and legal scholars, the chapters in this volume address such myths as "constitutions are binding social contracts," "constitutions are economic documents" and "constitutions are legal documents." Illustrating their analyses with historical and contemporary examples from the United States, Canada, and Europe, the authors build a multi-layered approach to understanding constitutions and their implications for social and political influence.

John Benjamins Publishing Love One and Hate the Other is a fictional memoir about the life of a young man who grows up inside the predominant culture war in the state of Alabama. That war is based on the Auburn-Alabama college football rivalry, and it shapes and affects every facet of life, from love to vocational choices. While the American obsession with college football provides an important framework for the story, this is more than a football tale. The author details Alabamians' extravagant cultural obsession through the eyes of protagonist Joe Billy Thompson as he recounts a memorable cast of characters: Uncle Moon Pie, the bigger-than-life quintessential Auburn fan; Old Man Parker, a 1932 graduate of Alabama; Jobab Robinson, the other-worldly high school football talent; Joe Billy's gorgeous junior high love, Betty Jean Asher; and, the Bama tailgate party crowd gathered at Miss Truby's in the theater district in New York. Importantly, Joe Billy's memoir documents the prevalent thread of institutional and cultural racism during the time-frame of the narrative. Also, while many books document the South's obsession with football, this story uses football to frame ventures into love, romance, weddings, funerals, church services, and betting gains and losses.

The introduction of endosonographically guided fine-needle biopsy has led to increasing use of longitudinal scans in the endosonographic diagnosis of tumors and other diseases of the upper gastrointestinal tract as well as of the pancreas. In this handbook, experts concentrate primarily on practical aspects of using endosonography with longitudinal scans. Examination techniques, interpretation of the ultrasound images, and normal anatomy with important guiding structures are demonstrated by means of 3D CT images and the corresponding endosonographic images. In addition, pathological endosonographic findings and the current status of diagnosis using fine-needle biopsy are described.
