This textbook will prove invaluable to teacher educators, teachers, educational psychologists, and any professional who is involved with teaching children to read. It provides a detailed examination of the processes that are involved in achieving fluent word reading skills and ability to comprehend written texts. Understanding these processes and their development empowers teachers to select appropriate, evidence-based teaching strategies and thus teach children more effectively. The book is in four parts: Part 1 provides the reader with a Tutorial Review covering essential knowledge about language, and presenting the two dimensions of the Simple View of Reading. Part 2 concentrates on the word reading dimension, with chapters on processes in skilled word reading, the development of these processes, and practical advice on research validated teaching methods to develop children's word reading skills. Part 3 turns to the language comprehension dimension, with chapters on the comprehension of oral and written language, and on teaching reading comprehension. Part 4 introduces the reader to assessment practices and methods of identifying children with difficulties in either or both dimensions of the Simple View, and considers children with word reading difficulties and children with specific comprehension difficulties, describing effective evidence-based interventions for each type of difficulty.

Ladders to Literacy International Reading Assn
A groundbreaking integrated approach to reading assessment that addresses each child's unique Learning Profile
Fifteen to twenty percent of our nation's children have reading difficulties. Educational evalua-tors must be able to use progress monitoring and diagnostic tools effectively to identify students who may be at risk, evaluate the effectiveness of school-wide reading programs, and suggest interventions that will improve reading skills. Written from a strengths-based perspective, Reading Assessment: Linking Language, Literacy, and Cognition is the first book of its kind to present a research-based, integrated review of reading, cognition, and oral language testing and assessment. Author Melissa Lee Farrall explores the theoretical underpinnings of reading, language, and literacy, explains the background of debates surrounding these topics, and provides detailed information and administration tips on the wide range of reading inventories and standardized tests that may be used in a reading psychoeducational assessment. With a focus on how to craft professional evaluation reports that illuminate a student's strengths—not just weaknesses—Reading Assessment enables school psychologists and diagnosticians, reading specialists, and special education professionals to conduct evaluations and develop effective interdisciplinary remedial recommendations and interventions. Clear, engaging, and inviting, Reading Assessment features: Case examples and practice exercises Chapter-opening reviews of each theory Strengths, weaknesses, and potential problems of tests and their interpretations Chapter-ending review questions that foster skill development and critical thinking Comprehensive information on more than 50 different assessment tests
Reading Assessment is an invaluable resource that helps professionals gain the knowledge and skills to confidently interpret test results and prepare detailed and effective evaluation reports designed to meet each child's unique needs as a learner.

Counseling in Communication Disorders Brookes Publishing Company
A highly accessible analysis of US security policy in the post-Cold War era, for both undergraduate and graduate students. It traces the efforts of both the Bush and Clinton administrations to redefine US security strategy, emphasizing the regional as opposed to the global nature of threats to American security interests, and highlights the constraints that the pressing social and economic agenda in the US have placed upon the formulation and conduct of American foreign and defense policies at a time of reduced external threat.
