achieved by following methods:
Stator frequency — 3 phase
motor speed control methods

The synchronous speed can be
changed by changing the stator
supply frequency (f). But only
change in supply frequency,
keeping supply voltage constant
has an adverse effect on the air
gap flux.

Speed control of Dc motor. Speed
control of dc motor is the most
important feature we interest in,
when we control the speed we
vary it according to the
requirements and the operation
we need.. You can sense the effect
of speed control of dc motor in
the movement of robotic vehicles,
movement in elevators,
movement in paper mills and so
on when different types of Dc
motors are used.
