indispensable authority on what's new and what's news. Through coverage of politics, crime, dining, style, business, sports, and arts and entertainment, each issue offers compelling narrative stories and lively, urbane coverage of Indy's cultural landscape. Claudette Colvin McGraw-Hill Education How can an undergraduate college education prepare learners to cope with the current COVID-19

pandemic? This collection of short essays, written by experts in 25 academic fields of study, addresses this very question. Each chapter brings perspective and insight from that discipline, presenting one useful idea and a recommended course of action. This one-of-a-kind resource is ideal for students, instructors, and administrators, particularly during the 2020-2021-academic year when institutions are challenged to continue their educational missions in the

midst of a public health crisis that affects every aspect of college life. The Indiana Teacher Houghton Mifflin Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region. Complete Book of Colleges Macmillan Visitors to Yellowstone National Park are drawn to the spectacular scenery, unique thermal features, and the large

numbers of wild animals easily observed in their natural habitat. The thoughtful visitor to the park cannot help but be captivated by the unparalleled breadth of scientific knowledge needed to understand the intricate interrelationships that make up the Yellowstone landscape. Knowing Yellowstone explores how scientists discover what they know about America's first national park and the surrounding lands. The chapter authors are

scientists who represent the best of their fields of study. The science they describe is leading the way to our understanding of complex ecosystems worldwide. Indianapolis Monthly Rowman & Littlefield The author explains his path to photography, including key career moments and his philosophy of the art, complemented by the portrait, scenic, and artistic photographs that have made him famous. Indianapolis Monthly Penguin Real Estate Principles: A Value

Approach demonstrates how value is central to virtually all real estate decision-making. Students using Ling and Archer should finish the course with a value-oriented framework and a set of valuation and decision making tools that can be applied in a variety of real-world situations. The key to making sound investment decision is to understand how property values are created, maintained, increased or destroyed. Since the launch of Real Estate Principles: A

---

Value Approach, significant and lasting changes have come upon the world of real estate. This is very true in real estate finance and capital sources where most of the traditional lenders have been transformed or displaced, giving way to a radically different set of players in mortgage finance. There has been change with profound and far-reaching implications in a world where it is understandable that property values can go down as well as up. This realization will color every aspect of real estate

investment, finance and transactions for the foreseeable future.

Its startling insights into accelerating

change led a president to ask his advisers for a special report, inspired composers to write symphonies and rock music, gave a powerful new concept to social science, and added a phrase to our language. Published in over fifty countries, *Future Shock* is the most important study of change and adaptation in our time. In many ways, *Future Shock* is about the present. It is about what is happening today to people and groups who are overwhelmed by change. Change

Class—They're Not  
Millennials

Anymore  
Generation Z is rapidly replacing Millennials on college campuses. Those born from 1995 through 2010 have different motivations, learning styles, characteristics, skill sets, and social concerns than previous

generations. Unlike Millennials, Generation Z students grew up in a recession and are under no illusions about their prospects for employment after college. While skeptical about the cost and value of higher education, they are also entrepreneurial, innovative, and independent learners concerned with effecting social change. Understanding Generation Z's mindset and goals is paramount to supporting, developing, and educating them through higher education. Generation Z Goes to College showcases

findings from an in-depth study of over 1,100 Generation Z college students from 15 vastly different U.S. higher education institutions as well as additional studies from youth, market, and education research related to this generation. Authors Corey Seemiller and Meghan Grace provide interpretations, implications, and recommendations for program, process, and curriculum changes that will maximize the educational impact on Generation Z students.
