Intermediate Accounting

Financial accounting is undergoing a period of unprecedented change. The FASB and IASB have been working together to issue converged accounting standards that will dramatically change key reporting areas, and more generally have sought to converge accounting standards over time. In late 2011, the SEC will announce its decision on whether large public companies in the U.S. will be able to choose whether to report under U.S. GAAP or IFRS or if all companies are anticipated to be reporting under IFRS in the near future. So, while there currently is considerable overlap between U.S. GAAP and IFRS, and that overlap is increasing as convergence continues, important differences remain. To help instructors deal with the challenging environment, the Spiceland team is committed to providing current, comprehensive and clear coverage of intermediate accounting. The 7th edition reflects this commitment with the following innovations.

The Horngren System of instruction replicates

the classroom experience by providing more “ I get it ” moments outside of class. We ’ ve talked to tons of POA instructors and our editors have even taken the accounting course (numerous times!) to figure out the following issue in this course that is consistent: Students understand (or “ get it ”) right after you do a problem in class, but as soon as they leave class, with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help, or they just quit and get behind in the course. On top of this, you can end up getting behind in the course as well, in order to keep everyone on track. The Horngren system helps to recreate the “ I get it ” moments outside of class-- keeping both you and the students on track.
