Asian Brand Strategy (Revised and Updated) Cambridge University Press "I m the fat Puerto Rican Polish girl who doesn t feel like she belongs in her skin, or anywhere else for that matter. I ve always been too much and yet not enough." Sugar Legowski-Gracia wasn t always fat, but fat is what she is now at age seventeen. Not as fat as her mama, who is so big she hasn t gotten out of bed in months. Not as heavy as her brother, Skunk, who has more meanness in him than

fat, which is saying something. But she s large enough to be the object of ridicule wherever she is: at the grocery store, walking down the street, at school. Sugar s life is dictated by taking care of Mama in their run-down home cooking, shopping, and, well, eating. A lot of eating, which Sugar hates as much as she loves. When Sugar meets Even (not Evan his nearly illiterate father misspelled his name on the birth certificate), she has the new experience of someone seeing "her" and not her body. As their unlikely friendship builds, Sugar allows herself to think about the future for the first time, a future not weighed down by her body or her mother.

Soon Sugar will have to decide whether to become the girl that Even helps her see within herself or to sink into the darkness of the skin-deep role her family and her life have created for her."

Advances in Social and Occupational Ergonomics FSG Originals In a vast and all-embracing study of Africa, from the origins of mankind

to the AIDS epidemic, John Iliffe refocuses its history on the peopling of an environmentally hostile continent. Africans have been pioneers struggling against disease and nature, and their social, economic and political institutions have been designed to ensure their survival. In the context of medical progress and other twentieth-century innovations, however, the same institutions have bred the most rapid population growth the world has ever seen. Africans: The History of a

Continent is thus a single story binding living Africans to their earliest human ancestors. Arrogant Bastard Harlequin This book presents the proceedings of International Conference on Knowledge Society: Technology, Sustainability and Educational Innovation (TSIE 2019). The conference, which was held at UTN Ibarra, Ecuador, on 3 – 5 July 2019, allowed participants and speakers to share their research and findings on emerging and

innovative global issues. The conference was organized in collaboration with a number of research groups: Group for the Scientific Research Network (e-CIER); Research Group in Educational Innovation and Technology, University of Salamanca, Spain (GITE-USAL); International Research Group for Heritage and Sustainability (GIIPS), and the Social Science Research Group (GICS). In addition, it had the endorsement of the RedCLARA, e-

science, Fidal Foundation, Red CEDIA, IEEE, Microsoft, Business IT, Adobe, and Argo Systems. The term “ knowledge society ” can be understood as the management, understanding and co-creation of knowledge oriented toward the sustainable development and positive transformation of society. In this context and on the occasion of the XXXIII anniversary of the Universidad T écnica del Norte (UTN), the Postgraduate Institute through its Master of

Technology and Educational Innovation held the I International Congress on Knowledge Society: Technology, Sustainability and Educational Innovation – TSIE 2019, which brought together educators, researchers, academics, students, managers, and professionals, from both the public and private sectors to share knowledge and technological developments. The book covers the following topics: 1. curriculum, technology and educational

innovation; 2. media and education; 3. applied computing; 4. educational robotics. 5. technology, culture, heritage, and tourism development perspectives; and 6. biodiversity and sustainability. My father has hated me since the day I was born. The feeling was mutual. In the shady underworld that was my legacy, Cleo McCarthy became my light. She was beautiful, passionate, and my whole world. So naturally my father had to destroy us. First he sent me away. Next he claimed Cleo as his own. But now I've returned, and nothing will stop me from taking back everything that is rightfully mine. He was the love of my life - when my life was still my own. We were young enough to

believe we would last forever, Axel and I. But neither of us realized how cruel life - and our families - could be. Now I'm trapped in a gilded cage: desired by Axel, who must never know the full truth, and controlled by his father, who would sooner see me dead than free. And I wouldn't even care, except that it's no longer only my life at stake. Everyone is talking about this addictive must-read mystery with shades of Serial and Making a Murderer about an investigation turned obsession,

full of twists and turns and with an ending you'll never expect. Everyone in Fairview knows the story. Pretty and popular high school senior Andie Bell was murdered by her boyfriend, Sal Singh, who then killed himself. It was all anyone could talk about. And five years later, Pip sees how the tragedy still haunts her town. But she can't shake the feeling that there was more to what happened that day. She knew Sal when she was a child, and he was always so kind to her. How could he possibly have been a killer?

Now a senior herself, Pip decides to reexamine the closed case for her final project, at first just to cast doubt on the original investigation. But soon she discovers a trail of dark secrets that might actually prove Sal innocent . . . and the line between past and present begins to blur. Someone in Fairview doesn't want Pip digging around for answers, and now her own life might be in danger. And don't miss the sequel, *Good Girl, Bad Blood!* "The perfect nail-biting mystery." --Natasha

Preston, #1 New York Times bestselling author Building and Sustaining Strong Global Brands in Asia Springer Nature Leading experts survey the currently available technologies designed to improve the delivery of today's cancer chemotherapeutic agents. The authors review both the theoretical and practical considerations governing conventional and nonconventional methods of drug administration, and identify promising opportunities for product development. In their outline and discussion of the use of novel formulation technologies- including synthetic

polymers and biomaterials for prolonged or sustained drug release to achieve potentially greater therapeutic effect-they profile those technologies that have resulted in a number of approved and late-stage clinical products.

Marvin Kalb, a

former journalist

and Harvard

professor, traces

how the Crimea of

Catherine the Great

became a global

tinder box. The

world was stunned

when Vladimir Putin

invaded and seized

Crimea in March

2014. In the weeks

that followed, pro-

Russian rebels staged

uprisings in

southeastern

Ukraine. The United States and its Western allies immediately imposed strict sanctions on Russia and whenever possible tried to isolate it diplomatically. This sharp deterioration in East-West relations has raised basic questions about Putin's provocative policies and the future of Russia and Ukraine. Marvin Kalb, who wrote commentaries for Edward R. Murrow before becoming CBS News' Moscow bureau chief in the late 1950's, and who also served as a translator and junior press officer at the US Embassy in Moscow, argues that,

contrary to conventional wisdom, Putin did not "suddenly" decide to invade Crimea. He had been waiting for the right moment ever since disgruntled Ukrainians rose in revolt against his pro-Russian regime in Kiev's Maidan Square. These demonstrations led Putin to conclude that Ukraine's opposition constituted an existential threat to Russia. Imperial Gamble examines how Putin reached that conclusion by taking a critical look at the recent political history of post-Soviet Russia. It also journeys deep into Russian and

Ukrainian history to explain what keeps them together and yet at the same time drives them apart. Kalb believes that the post-cold war world hangs today on the resolution of the Ukraine crisis. So long as it is treated as a problem to be resolved by Russia, on the one side, and the United States and Europe, on the other, it will remain a danger zone with global consequences. The only sensible solution lies in both Russia and Ukraine recognizing that their futures are irrevocably linked by geography, power, politics, and the history that Kalb brings to life in *Imperial Gamble*.

From *FSGO x Logic*: stories about rural China, food, and tech that reveal new truths about the globalized world
In *Blockchain Chicken Farm*, the technologist and writer Xiaowei Wang explores the political and social entanglements of technology in rural China. Their discoveries force them to challenge the standard idea that rural culture and

people are backward, conservative, and intolerant. Instead, they find that rural China has not only adapted to rapid globalization but has actually innovated the technology we all use today. From pork farmers using AI to produce the perfect pig, to disruptive luxury counterfeits and the political intersections of e-commerce villages, Wang unravels the ties between globalization, technology, agriculture, and commerce in unprecedented fashion. Accompanied by humorous “Sinofuturist” recipes that frame meals as they transform under new technology, Blockchain Chicken Farm is an original and probing look into innovation,

connectivity, and collaboration in the digitized rural world. FSG Originals x Logic dissects the way technology functions in everyday lives. The titans of Silicon Valley, for all their utopian imaginings, never really had our best interests at heart: recent threats to democracy, truth, privacy, and safety, as a result of tech’s reckless pursuit of progress, have shown as much. We present an alternate story, one that delights in capturing technology in all its contradictions and innovation, across borders and socioeconomic divisions, from history through the future, beyond platitudes and PR hype, and past doom and gloom. Our collaboration features four brief but

provocative forays into the tech industry’s many worlds, and aspires to incite fresh conversations about technology focused on nuanced and accessible explorations of the emerging tools that reorganize and redefine life today.
