Meeting your patients spiritual needs - American Nurse

According to O'Brien (Spirituality in Nursing 2003) there are three key activities for spiritual caring: being with patients in their experiences of pain, suffering, or other problems or needs; listening to patients verbally express anxieties or emotions, such as fear, anger, loneliness, depression, or sorrow, which may be hindering the achievement of wellness; and touching patients either physically, emotionally, or spiritually to assure them of their connectedness with others in the family ...

Spiritual Care in Holistic Nursing Education: A ...

Spiritual care is a subjective and dynamic concept, a unique aspect of care that integrates all the other aspects. It emerges in the context of nurses' awareness of the transcendent dimension of life and reflects a patient's reality.

Spiritual Care in Nursing

A growing body of evidence shows spirituality is an important component of emotional wellness for many patients, particularly those facing chronic or life-threatening illnesses. At the same time, however, healthcare providers who have direct patient contact, including nurses, struggle to incorporate spirituality into individualized patient care.

Spiritual Care Association

All nursing codes of ethics assume that spiritual assessment and care is part of nursing practice, and refer to spirituality as "an obligation of care." For example, the International Council of Nurses Code of Ethics states that the nurse is to "Provide an environment in which the human rights, values, customs, and spiritual beliefs [of the client] are respected."

A historical overview of spirituality in nursing

Spirituality in health care is "that part of person that gives meaning and purpose to the person's life. Belief in a higher power that may inspire hope, seek resolution, and transcend physical and conscious constraints." 1 Spirituality in nursing is an important part of overall healthcare.
