In Spooky Action at a Distance, published by Farrar, Straus and Giroux, award-winning science writer George Musser sets out to answer that question, offering a provocative exploration of nonlocality and a celebration of the scientists who are trying to understand it.

Spooky Action At A Distance

If "action" is defined as a force, physical work or information, then it should be stated clearly that entanglement cannot communicate action between two entangled particles (Einstein's worry about "spooky action at a distance" does not actually violate special relativity). What happens in entanglement is that a measurement on one entangled particle yields a random result, then a later ...
