Industry.

**Spotlight Science** Spotlight Science  
Teacher Support Pack 9

Offering practical support and solutions for today's curriculum problems, this series is an all-ability science course for Key Stage 3. Accompanying the Year 8 pupils' book, this guide includes photocopiable material, and lesson notes giving suggestions and advice. A course guide is also available.

**Physics for You** Teacher Created Resources  
Spotlight Science Teacher Support Pack  
9 Nelson Thornes

**The Working Press of the Nation** Nelson Thornes  
'Spotlight Science' lessons are offered in double page spread format. Each lesson commences with a starter activity, designed to stimulate students' thinking and to engage their interest. Each lesson concludes with summary questions for consolidation of knowledge and understanding.

*The School Science Review* Vikas Publishing  
House

Each double-page spread provides a complete teaching unit of about one hour; The illustrations are in full colour and are always shown close to the relevant text; The reading age of the sentences and the number of words on a page have been carefully controlled; The sentence structure is simple, accessible and friendly, with clear personalised questions; The pages are carefully designed to show the pupils a very clear route through each

spread; Every page has a 'Things to do' section of questions. These are useful for homework, or as extra work for faster students, or for work during staff absence; For more information visit the website at [www.spotlightscience.co.uk](http://www.spotlightscience.co.uk)

*Children's Books in Print* Nelson Thornes

In the last few years, the focus of the training of science teachers has shifted significantly towards the school based experience. Drawing on the successful Oxford University science internship scheme, this book presents insights of mentoring from several perspectives, providing a rich resource of case study material. After introductory chapters dealing with the rationale for the science internship course, the reader is presented with: logs of mentors' and students' experiences that offer 'windows' onto the mentoring process at different stages in the PGCE course; cameos of students who have been at the centre of a range of complex training situations; reflections of past PGCE students; and accounts of the experiences of heads of science departments when managing the placement of science PGCE students in their schools.

**Spotlight on Music** Nelson Thornes

The Milestones series conforms to CBSE's CCE scheme, strictly adhering to the NCERT syllabus. The text is crisp, easy to understand, interactive, informative and activity-based. The series motivates young minds to question, analyse, discuss and think logically.

**Spotlight Science Key Stage 3/S1-S2**

**Spotlight on Young Children**

Offering practical support and solutions for today's curriculum problems, this series is an all-ability science course for Key Stage 3. Accompanying the Year 8 pupils' book, this guide includes photocopiable material, and lesson notes giving suggestions and advice. A course guide is also available.

**Spotlight Science 8** Oxford University  
Press, USA

This Framework Edition Teacher Support Pack offers support and guidance.

The Spiral Edition Assessment Resource Banks provide End-of-Topic tests for each topic. These can help to provide you with evidence for your assessment of Sc2-4, and help you arrive at a Level for your teacher Assessment.

### **Educational Film & Video Locator of the Consortium of College and University Media Centers and R.R. Bowker** Nelson Thornes

An insider's view on bringing extinct species back to life Could extinct species, like mammoths and passenger pigeons, be brought back to life? In *How to Clone a Mammoth*, Beth Shapiro, an evolutionary biologist and pioneer in ancient DNA research, addresses this intriguing question by walking readers through the astonishing and controversial process of de-extinction. From deciding which species should be restored to anticipating how revived populations might be overseen in the wild, Shapiro vividly explores the extraordinary cutting-edge science that is being used to resurrect the past. Considering de-extinction's practical benefits and ethical challenges, Shapiro argues that the overarching goal should be the revitalization and stabilization of contemporary ecosystems. Looking at the very real and compelling science behind an idea once seen as science

fiction, *How to Clone a Mammoth* demonstrates how de-extinction will redefine conservation's future.
