THE Journal Teacher Created Resources

'Spotlight Science' lessons are offered in double page spread format. Each lesson commences with a starter activity, designed to stimulate students' thinking and to engage their interest. Each lesson concludes with summary questions for consolidation of knowledge and understanding.

Spotlight Science Nelson Thornes

An insider's view on bringing extinct species back to life Could extinct species, like mammoths and passenger pigeons, be brought back to life? In *How to Clone a Mammoth*, Beth Shapiro, an evolutionary biologist and pioneer in ancient DNA research, addresses this intriguing question by walking readers through the astonishing and controversial process of de-extinction. From deciding which species should be restored to anticipating how revived populations might be overseen in the wild, Shapiro vividly explores the extraordinary cutting-edge science that is being used to resurrect the past. Considering de-extinction's practical benefits and ethical challenges, Shapiro argues that the overarching goal should be the revitalization and stabilization of contemporary ecosystems. Looking at the very real and compelling science behind an idea once seen as science fiction, *How to Clone a Mammoth* demonstrates how de-extinction will redefine conservation's future.

Occupational Outlook Handbook Vikas Publishing House

An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

The British National Bibliography Nelson Thornes

Provides students with songs and activities to increase their understanding of music and its diversity. Nelson Thornes

Each new print copy includes Navigate 2 Advantage Access that unlocks a comprehensive and interactive eBook, student practice activities and assessments, a full suite of instructor resources, and learning analytics reporting tools. Designed for the undergraduate, introductory environmental science course, the thoroughly updated and redesigned tenth edition of *Environmental Science* continues to present a comprehensive, student-friendly introduction to contemporary environmental issues with an emphasis on sustainable solutions that meet social, economic, and environmental goals. This acclaimed book is the only text that explores the underlying causes of environmental problems and root-level solutions and presents both sides of many critical issues. Thought-provoking features throughout, including Critical Thinking Exercises, Key Concept and Spotlight on Sustainability boxes, Go Green tips, and Point/Counterpoint debates, along with the updated statistics and data of key issues, encourage readers to become much deeper and more critical thinkers. Current and highly relevant, the Tenth Edition discusses the challenges of the growing human population and resource depletion and solutions that address these issues in a sustainable manner. The book also discusses nonrenewable and renewable energy options and their pros and cons, and provides expanded coverage of local, regional, national, and global environmental issues and sustainable solutions. This comprehensive text includes updated coverage of environmental economics, ecology, and the application of science and technology to environmental concerns. With a strong focus on sustainability and critical thinking, a topic the author introduced to the environmental science market, *Environmental Science*, Tenth Edition is an essential resource for students to understand the impact they have on the environment and ways that they can help solve them. With Navigate 2, technology and content combine to expand the reach of your classroom. Whether you teach an online, hybrid, or traditional classroom-based course, Navigate 2 delivers unbeatable value. Experience Navigate 2 today at www.jblnavigate.com/2

The Elementary School Library Collection, Phases 1-2-3 Nelson Thornes

The World Book Encyclopedia Petrogav International

The Milestones series conforms to CBSE's CCE scheme, strictly adhering to the NCERT syllabus. The text is crisp, easy to understand, interactive, informative and activity-based. The series motivates young minds to question, analyse, discuss and think logically.

The School Science Review Princeton University Press

In the last few years, the focus of the training of science teachers has shifted significantly towards the school based experience. Drawing on the successful Oxford University science internship scheme, this book presents insights of mentoring from several perspectives, providing a rich resource of case study material. After introductory chapters dealing with the rationale for the science internship course, the reader is presented with: logs of mentors' and students' experiences that offer 'windows' onto the mentoring process at different stages in the PGCE course; cameos of students who have been at the centre of a range of complex training situations; reflections of past PGCE students; and accounts of the experiences of heads of science departments when managing the placement of science PGCE students in their schools.
