Spotlight Science 8 - Teacher Support Pack Spiral Edition Nelson Thornes

Natalie's uplifting story of using the scientific process to "save" her mother from depression is what Booklist calls "a winning story full of heart and action." Eggs are breakable. Hope is not. When Natalie's science teacher suggests that she enter an egg drop competition, Natalie thinks that this might be the perfect solution to all of her problems. There's prize money, and if she and her friends wins, then she can fly her botanist mother to see the miraculous Cobalt Blue Orchids--flowers that survive against impossible odds. Natalie's mother has been suffering from depression, and Natalie is sure that the flowers' magic will inspire her mom to love life again. Which means it's time for Natalie's friends to step up and show her that talking about a problem is like taking a plant out of a dark cupboard and giving it light. With their help, Natalie begins an uplifting journey to discover the science of hope, love, and miracles. A vibrant, loving debut about the coming-of-age moment when kids realize that parents are people, too. Think THE FOURTEENTH GOLDFISH meets THE THING ABOUT JELLYFISH. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR * KIRKUS REVIEWS * THE CHICAGO PUBLIC LIBRARY * "Natalie's Korean heritage is sensitively explored, as is the central issue of depression." --Publishers Weekly "A compassionate glimpse of mental illness accessible to a broad audience." --Kirkus Reviews, STARRED REVIEW "Holy moly!!! This book made me feel." --Colby Sharp, editor of The Creativity Project, teacher, and cofounder of Nerdy Book Club

The Framework Edition Assessment Resource Banks provide End-of-Topic tests to help you with evidence for your assessment of Sc2-4, and help you arrive at a level for your teacher assessment.

Spotlight Science Nelson Thornes

In the last few years, the focus of the training of science teachers has shifted significantly towards the school based experience. Drawing on the successful Oxford University science internship scheme, this book presents insights of mentoring from several perspectives, providing a rich resource of case study material. After introductory chapters dealing with the rationale for the science internship course, the reader is presented with: logs of mentors' and students' experiences that offer 'windows' onto the mentoring process at different stages in the PGCE course; cameos of students who have been at the centre of a range of complex training situations; reflections of past PGCE students; and accounts of the experiences of heads of science departments when managing the placement of science PGCE students in their schools.

This product has not changed in any way, a new ISBN has simply been allocated to it.

Spotlight Science 7 - Revised Edition Macmillan Higher Education

"Our calling is to drop our egos, commit to removing barriers, and treat our learners with the unequivocal respect and dignity they deserve." --Mirko Chardin and Katie Novak When it comes to the hard work of reconstructing our schools into places where every student has the opportunity to succeed, Mirko Chardin and Katie Novak are absolutely convinced that teachers should serve as our primary architects. And by "teachers" they mean legions of teachers working in close collaboration. After all, it's teachers who design students' learning experiences, who build student relationships . . . who ultimately have the power to change the trajectory of our students' lives. Equity by Design is intended to serve as a blueprint for teachers to alter the all-too-predictable outcomes for our historically under-served students. A first of its kind resource, the book makes the critical link between social justice and Universal Design for Learning (UDL) so that we can equip students (and teachers, too) with the will, skill, and collective capacity to enact positive change. Inside you'll find: Concrete strategies for designing and delivering a culturally responsive, sustainable, and equitable framework for all students Rich examples, case studies, and implementation spotlights of educators, students (including Parkland survivors), and programs that have embraced a social justice imperative Evidence-based application of best practices for UDL to create more inclusive and equitable classrooms A flexible format to facilitate use with individual teachers, teacher teams, and as the basis for whole-school implementation "Every student," Mirko and Katie insist, "deserves the opportunity to be successful regardless of their zip code, the color of their skin, the language they speak, their sexual and/or gender identity, and whether or not they have a disability." Consider Equity by Design a critical first step forward in providing that all-important opportunity. Also From Corwin:

Spotlight Science Teacher Support Pack 7: Framework Edition Nelson Thornes

This Framework Edition Teacher Support Pack offers support and guidance.

Spotlight Science Nelson Thornes

Each double-page spread provides a complete teaching unit of about one hour. The illustrations

are in full colour and are always shown close to the relevant text. The reading age of the sentences and the number of words on a page have been carefully controlled. The sentence structure is simple, accessible and friendly, with clear personalised questions. The pages are carefully designed to show the pupils a very clear route through each spread. Every page has a 'Things to do' section of questions. These are useful for homework, or as extra work for faster students, or for work during staff absence.
