This challenging and highly practical book draws on the findings from an international study designed to help practitioners and researchers understand the factors and processes that enable healthcare organisations in the United States and Europe to achieve - and sustain - high quality services for their users. The in-depth case-studies from seven leading hospitals give an international, evidence-based outlook that focuses on both the organisational and cultural processes of quality improvement. Implication for research and practice are considered, and a checklist of possible challenges has been drawn up to help identify any 'gaps' in initiatives. Healthcare policy makers and shapers including hospital chief executives and NHS directors will find this book enlightening, as will healthcare quality improvement and service development researchers and professionals. Clinicians with an interest in quality improvement will also find much of interest.

The early part of your career can be tough. You have to work out what type of work will suit you best, navigate how your company works, do well at your job and deal with tough times. This book is designed to walk you through important decision-making processes, to act as a helpful support when things get tough and to help with those big decisions to keep you on the right path in your early career phase. The book starts with values and principles — understanding what those are and their foundational importance to your career. It moves on to the game plan — setting goals, keeping motivated — and the need for one to get anywhere. There is also valuable advice on how to cope with and overcome rejection, failures and other tough situations. Moreover, promotion is a key aim for most people at the early stage of their career, and the author provides guidance on the best way to achieve that

This unique documentary history brings together manifestos, Supreme Court decisions, congressional testimonies, speeches, articles, book excerpts, pastoral letters, interviews, song lyrics, memoirs, and poems reflecting the vitality, diversity, and changing nature of religious belief and practice in America since 1945. Covering both the center and the margins of American religious life, these documents reflect the role of religion and theology in the civil rights, feminist, and gay rights movements as well as in the conservative responses to these. Issues regarding religion and contemporary American culture are explored in documents about the rise of the evangelical movement and the religious right; the impact of "new" (post-1965) immigrant communities on the religious landscape; the popularity of alternative, New Age, and non-Western beliefs; and the relationship between religion and popular culture. The editors conclude with selections exploring major themes of American religious life at the millennium as well as excerpts that speculate on the future of religion in the United States.

This Is Disciplinary Literacy Petrogav International
With a new subtitle to reflect its global perspective and a new author, this book continues the mission of earlier editions to describe the stages of food development in detail, beginning with sources of ideas and moving through development, final screening and introduction into the marketplace. Every chapter contains one or more case studies. New chapters address the tools available for the food industry and manufacturers to select, sharpen, fine-tune and support new food product launches. More attention is given to the influence of global concerns about the deteriorating environment, and here particularly, the role and responsibility of the food industry and those working on new food products. Key Features: This edition adds the perspective from single product or product range development to the overall portfolio management. This edition explains strategies for successful management of unpredictable, uncertain and complex conditions in new food product development (NFPD). Chapters contain one or more case studies to add pedagogy for students and practical applications for professionals. More focus is given to the role and responsibilities of research and development (R&D) in innovation management. Two chapters are used to predict the future direction for NFPD. This book can serve as the core textbook for the capstone new food product development course typically found in the food science curriculum and is of equal value to early career food scientists finding themselves in a multidisciplinary team working on the creation of a new food product.
