Spring Roo Reference Documentation

Spring Roo. Spring Roo is a community project which provides an alternative, code-generation based approach at using convention-over-configuration to rapidly build applications in Java. It currently supports Spring Framework, Spring

Security and Spring Web Flow. Roo differs from other rapid application development frameworks by focusing on:

Spring Roo - **Wikipedia**

The GWT documentation page in the Roo reference seems to be out of date/incorrect as well. Figure 14.2 in the GWT page in the Roo reference shows the file which I needed to fix my problem but it doesn't do a good job at explaining how it got there (the documentation only mentions generating the *Proxy and *Request classes and the diagram highlights them as such).

Spring | Home

Spring Roo is a popular open-source rapid application development (RAD) tool for Java developers. It enables the developer to build best-practice, high-quality, lock-in-free enterprise ...

Project Reactor - Documentation
