dimensional river hydraulics. The HEC-RAS River Analysis System is intended to be the successor to the current steady-flow HEC-2 Water Surface Profiles Program as well as provide unsteady flow, sediment transport, and hydraulic design capabilities in the future. A common data representation of a river network is used by all modeling methods, thus

allowing the user to more easily migrate from steady-flow model with several significant advances over HEC-2. An overview of the Version 1 program package and some of the improved hydraulic features are presented.

*Education And Awareness Of Sustainability - Proceedings Of The 3rd Eurasian Conference On Educational Innovation 2020 (Ecei 2020)* Wolters Kluwer

This book reports on research and developments in human-technology interaction. A special emphasis is given to human-computer interaction, and its implementation for a wide range of purposes such as healthcare, aerospace, telecommunication, and

---

education, among others. The human aspects are analyzed in detail. Timely studies on human-centered design, wearable technologies, social and affective computing, augmented, virtual and mixed reality simulation, human rehabilitation and biomechanics represent the core of the book. Emerging technology applications in business, security, and infrastructure are also critically examined, thus offering a timely, scientifically-

grounded, but also professionally-oriented snapshot of the current state of the field. The book is based on contributions presented at the 3rd International Conference on Human Interaction and Emerging Technologies: Future Applications, IHET 2020, held on August 27-29, 2020. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or

management of the new generation of service systems.

LexisNexis is now the exclusive commercial print publisher to the larger legal market. The Patent Case Management Judicial Guide features:

(1) Comprehensive patent law content in single volume covers early case management, preliminary injunctions, discovery, claim construction, pretrial case management, trial and post-trial procedures. Therefore, the content for practicing in highly-technical and expanding area of law is at your fingertips.

(2) Glossaries include local patent rules and model patent jury instructions. These are current with model patent jury instructions prepared by National Jury Instruction Project (June 2009).

(3) Margin Index to easily locate relevant content Although similar in many respects to other forms of complex civil litigation, patent cases pose distinctive case-management challenges. As the number, size, and complexity of patent cases have grown throughout the United States over the past several decades -- paralleling expansion in the role of high technology enterprises in the U.S. economy -- the need for a comprehensive, user-friendly, and practical judicial guide for managing patent cases has become increasingly apparent. Recognizing this, the authors surveyed the range of approaches and perspectives on patent case management, fostered discussion and

analysis of patent case management techniques, and developed this authoritative guide for judges, law clerks, practitioners, and patent and civil procedure professors and scholars. The Patent Case Management Judicial Guide is a collaborative effort between the Federal Judicial Center and the Berkeley Center for Law & Technology of the University of California - Berkeley School of Law. Seniors Springer Nature The current price of virtual reality headsets may seem out of economic reach for most libraries, but the potential of “assisted reality” tools goes well beyond merely inviting patrons to strap on a pair of goggles. Ranging from enhanced training to using third-party apps to enrich digital collections, there is a kaleidoscope of library uses for augmented, virtual, or mixed reality. In this collection, Varnum and his hand-picked team of contributors share exciting,

surprising, and inspiring case studies from a mix of institution types, spotlighting such topics as collaborative virtual reality for improved library instruction, education, and learning and teaching; 3D modeling using virtual reality; virtual reality as collaboration space, from gaming to teleconferencing; balancing access with security, and other privacy issues; future possibilities for augmented reality in public libraries; and augmented reality for museums and special collection libraries. A perfect introduction to the

topic, this book will encourage libraries to look beyond their own reality and adapt the ideas inside.

In today's globalized world, professional fields are continually transforming to keep pace with advancing methods of practice. The theory of adult learning, specifically, is a subject that has seen new innovations and insights with the advancement of online and blended learning. Examining new principles and

characteristics in adult learning is imperative, as emerging technologies are rapidly shifting the standards of higher education. The Handbook of Research on Adult Learning in Higher Education is a collection of innovative research on the methods and applications of adult education in residential, online, and blended course delivery formats. This book will focus on the impact that culture, globalization, and emerging technology currently has on adult education. While highlighting topics including

andragogical principles, professional development, and artificial intelligence, this book is ideally designed for teachers, program developers, instructional designers, technologists, educational practitioners, deans, researchers, higher education faculty, and students seeking current research on new methodologies in adult education.
