Broadcasting & Cable Plunkett Research, Ltd.

The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and

cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our 350 company profiles include complete business descriptions and up to 27 executives by name and title.

Parentology Springer Science & Business Media

The eighth edition of Measurement and Evaluation in Physical Education and Exercise Science, now published in paperback and hardback, offers students a clear and practical guide to best practice for measurement and evaluation in school- and nonschool-based physical activity programs. Written by two academics with backgrounds in physical education teacher education (PETE), the book emphasizes the link between theory and practice and reflects the most recent changes in national physical education programs. It covers a full range of introductory topics, including current trends in measurement and evaluation, program development, statistics, test selection, and an expanded chapter on alternative assessment, before introducing: • measurement for health-related physical fitness • measurement for psychomotor skills • measurement for cognitive knowledge • measurement for affective behaviors • grading • self-evaluation. Each chapter features learning aids such as objectives, key terms, practical applications, and review questions, while an appendix offers in-depth Excel assignments. Offering a full companion website featuring an instructor's manual, lecture slides, and a test bank, Measurement and Evaluation in Physical Education and Exercise Science is a complete resource for instructors and students, alike. It is an essential text for students in measurement and evaluation classes as part of a degree program in physical education, exercise science or kinesiology, and a valuable reference for practitioners seeking to inform their professional practice.

Human Centered Design Toolkit Penguin

Functional Testing in Human Performance offers clinicians the first-ever compilation of information on clinical and data-based functional testing for sport, exercise, and occupational settings. This unique text serves as a primary resource for accurate assessment of individuals' functional abilities in order to develop program prescriptions to enhance their performance. Functional Testing in Human Performance is a comprehensive learning tool for novices and an essential reference for advanced clinicians. The text defines the role of function in physical performance and how it can be appropriately tested. Especially helpful for novices, the text explains testing criteria, testing terms relevant to research, and selecting the most appropriate test and testing sequence. Common testing mistakes are also presented as well as pitfalls to avoid when testing. The text also includes case studies that illustrate a variety of situations--including testing for a client recovering from a lower-extremity injury, discussing preseason testing for a large group of athletes, and presenting the study of a client in an occupational setting. These cases include detailed statistical analysis and normative data, offering clinicians the opportunity to consider the application of functional testing and implementation strategies adaptable to their specific practice setting. After laying a foundation, the text progresses to detailed testing procedures for discrete physical parameters and specific regions of the body. Tests are organized from least to most complex, and each test is presented in a step-by-step manner outlining the purpose of the test, equipment needed, testing procedure and recommendations for performing the test, interpretation of results, and the data to suggest normative values, reliability, and validity for each test. This formatting facilitates quick reference to testing information for on-the-spot use, whether in the clinic, athletic training room, gym, or job site. Throughout the text, the functional tests are accompanied by photos for visual clarity. To enhance understanding, a companion DVD features live-action demonstrations of 40 of the most advanced tests. Icons on those test pages indicate they are modeled on the DVD. In addition, the DVD may be loaded onto a computer to offer convenient print-on-demand access to reproducible forms for recording data from selected tests. Functional Testing in Human Performance offers a unique and comprehensive reference for assessment of physical activities in sport, recreation, work, and daily living. By presenting the theory and detailing the practice, this text assists clinicians in understanding and incorporating functional testing to identify their patients' or clients' limitations and enhance their performance, rehabilitation, and daily functioning.

Simon and Schuster

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Buying Guide 2007 Gulf Professional Publishing

Small enough to fit in your pocket, this practical little book will help you change the world as you shop! While we strive to make our vote count every four years, few of us realize that our most immediate power to shape the world is squandered on a daily basis. Every dollar we spend has the potential to create social and environmental change. In fact, it already has. The world that exists today is in large part a result of our purchasing decisions. The Better World Shopping Guide rates hundreds of products and services from A to F, so you can quickly tell the "good guys" from the "bad guys" and ensure your money is not supporting corporations that make decisions based solely on the bottom line. Drawing on decades of meticulous research, this completely revised and updated sixth edition will help you find out who actually "walks the talk" when it comes to: Environmental sustainability Human rights Community involvement Animal protection Social justice Small enough to fit in a back pocket or handbag and organized in a user-friendly format, The Better World Shopping Guide helps you reward companies who are doing good, penalize those involved in destructive activities, and change the world as you shop! Ellis Jones, PhD is the award-winning, bestselling author of five previous editions of The Better World Shopping Guide , and co-author of The Better World Handbook . A scholar of social responsibility, global citizenship, and everyday activism, he has dedicated himself to uncovering practical ways for people to make a difference in the world. He currently teaches at Holy Cross College in Worcester, MA.
