What Could Possibly Go Wrong... John Wiley & Sons While Universal's Dracula and Frankenstein (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated

fans and historians alike. Starting with The Last Warning, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows.

Filmographic data for the film conclude the entry. Universal's The Shadow short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

No one writes about cars like Jeremy Clarkson. While most correspondents are too busy diving straight into BHP, MPG and MPH, Jeremy appreciates that there are more important things to life. Don't worry, we'll get to the cars. Eventually. But first we should consider: • The case for invading France • The overwhelming appeal of a nice sit-down • The inconvenience of gin and tonic • Why clothes are no better than ice cream • Spot-welding with the Duchess of Kent • And why Denmark is the best place in the world

Armed only with conviction, curiosity, enthusiasm and a pair of stout trousers, Jeremy hurtles around the world - along motorway, autoroute, freeway and autobahn - in search of answers to life's puzzles and ponderings without forethought or fear for his own safety. What, you have to ask, could possibly go wrong . . .

Psychosocial Rehabilitation is a comprehensive ready-reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and

promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of

process, impact and outcome. Section 3 provides manuals and programs for intervention effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with group programmes as well as services provided by other agencies. The final section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction.

If a picture is worth a thousand words, then it's a good bet that at least half of those words relate to the picture's copyright status. Art historians, artists, and anyone who wants to use the images of others will find themselves awash in byzantine legal terms, constantly evolving copyright law, varying interpretations by museums and estates, and despair over the complexity of the whole situation. Here, on a white—*not a high—horse*, Susan Bielstein offers her decades of experience as an editor working with illustrated books. In doing so, she unsnarls the threads of permissions that have ensnared scholars, critics, and artists for

years. Organized as a series of “takes” that range from short sidebars to extended discussions, *Permissions, A Survival Guide* explores intellectual property law as it pertains to visual imagery. How can you determine whether an artwork is copyrighted? How do you procure a high-quality reproduction of an image? What does “fair use” really mean? Is it ever legitimate to use the work of an artist without permission? Bielstein discusses the many uncertainties that plague writers who work with images in this highly visual age, and she does so based on her years navigating precisely these issues. As an editor who has hired a photographer to shoot an

incredibly obscure work in the Italian mountains (a plan that backfired hilariously), who has tried to reason with artists' estates in languages she doesn't speak, and who has spent her time in the archival trenches, she offers a snappy and humane guide to this difficult terrain. Filled with anecdotes, asides, and real courage, *Permissions, A Survival Guide* is a unique handbook that anyone working in the visual arts will find invaluable, if not indispensable.

This book views Samsung Electronics in terms of corporate life cycle as well as product portfolio and strategy.

It also examines the issues Samsung faces as it proceeds further into the 21st century.

Written from the perspective of an experienced commentator on Korean and global business, this book presents not simply a

narrative or an adulatory and uncritical account of Samsung's rise, but a considered analysis of the secrets of success that both business students and CEOs will want to read and consider applying to their own companies.

A resolution to the vexed problem whether a troubadour's love is erotic or

spiritual is offered by Paolo Cherchi through a new reading of Andreas Capellanus' *De Amore* (written around 1186-1196).

He suggests that Andreas, using a rhetorical strategy that creates ambiguity, condemns courtly love because its claim that passion generates virtue is untenable and deceitful. Although Andreas grasped the core of the courtly love 'system,' namely, the relation between passion and ethics, he failed to consider the notion of *mezura*, that courtly virtue

through which troubadours transformed nature into culture, and erotic passion into social discourse. Cherchi offers an innovative interpretation and a close reading of selected poems. He traces the history of Provençal lyric poetry, highlighting some of the significant personalities and movements.

Shortly after 1998, leading members of Georgia's government, medical community, and public-spirited citizenry began considering ways in which some of Georgia's almost \$5 billion, 25-year settlement from the tobacco industry's Master Settlement Agreement with the 50 states could be used to benefit Georgia residents. Given tobacco's role in causing cancer, they decided to create an entity and program with the mission of making Georgia a national leader in cancer prevention, treatment, and research. This new entity-called the Georgia Cancer Coalition, Inc. (GCC)-and the

state of Georgia subsequently began implementing a far-reaching state cancer initiative that includes five strategic goals: (1) preventing cancer and detecting existing cancers earlier; (2) improving access to quality care for all state residents with cancer; (3) saving more lives in the future; (4) training future cancer researchers and caregivers; and (5) turning the eradication of cancer into economic growth for Georgia. Assessing the Quality of Cancer Care identifies a set of measures that could be used to gauge Georgia's progress in improving the quality of its cancer services and in reducing cancer-related morbidity and mortality.

At the beginning of the 1990s, Korean firms embarked on an impressive wave of direct investment abroad. This dramatic multinationalization was considered as yet another sign of Korea's remarkable economic performance, especially as a high proportion of the foreign ventures were located in advanced countries. But this unbalanced quest for globalization actually tested the 'Korean model' to its

limits; after the 1997 crisis a new policy prepared the way for a surge of inward investment. Using empirical tests and case-studies, this collection shows that Korean groups have invested in developed countries to jump over trade barriers, but also to source advanced technology and marketing capabilities. Moreover, their ambitious strategies have been stimulated by oligopolistic rivalry among the chaebols. From a policy perspective, the book provides an original discussion of national ownership by questioning the substitutability between inward and outward foreign investment and its relationship with the evolution of the national innovation system. By shedding light on the pattern of Korea's internationalization, these essays make a valuable contribution to the theory of international production and provide important insights for the current policy debates on globalization and innovation-led growth.
