The Rise and Fall of the Superconducting Super Collider Disha Publications

This book has been designed by combining the goodness of the original Wren & Martin text, High School Grammar & Composition, and specialized content developed by a panel of competitive examination experts in the area of the English language. The USP is therefore adapting a classical text to the needs of the various admission and recruitment competitive examination aspirants. Its exhaustive coverage ensures that virtually no competitive examination remains untouched. Students preparing for descriptive tests such as UPSC (Compulsory English and General English Papers of Main Exams) and state PCS examinations, Judicial Services examination, Indian Forest Service examination, Statistical Services and many other examinations in which subjective papers/tests are mandatory will find this book immensely useful. The book is also a boon for those students who are preparing for objective tests such as Banking and Insurance, SSC, UPSC preliminary, Defence Services, Law entrance, Business School entrance examinations, and many other admission and recruitment examinations. A unique feature of this book is demonstration of the connectedness of the concepts and their applications visually, with the help of arrows and pointers. The aspirant will also find questions from recent examinations on virtually every page of the book. An index of examination-wise questions has been included so that the aspirant can choose the sections according to the targeted examination and focus more. Topic-wise distribution of questions in English examination papers - both descriptive and objective - will also help aspirants to undertake a very well directed test-prep program using the book.

This Handbook is a comprehensive overview of English language education in Bangladesh. Presenting descriptive, theoretical, and empirical chapters as well as case studies, this Handbook, on the one hand, provides a comprehensive view of the English language teaching and learning scenario in Bangladesh, and on the other hand comes up with suggestions for possible decolonisation and de-eliticisation of English in Bangladesh. The Handbook explores a wide range of diverse endogenous and exogenous topics, all related to English language teaching and learning in Bangladesh, and acquaints readers with different perspectives, operating from the macro to the micro levels. The theoretical frameworks used are drawn from applied linguistics, education, sociology, political science, critical geography, cultural studies, psychology, and economics. The chapters examine how much generalisability the theories have for the context of Bangladesh and how the empirical data can be interpreted through different theoretical lenses. There are six sections in the Handbook covering different dynamics of English language education practices in Bangladesh, from history, policy and practice to assessment, pedagogy and identity. It is an invaluable reference source for students, researchers, and policy makers interested in English language, ELT, TESOL, and applied linguistics.

Hearings Before a Subcommittee of the Committee on Appropriations, House of Representatives, One Hundred Thirteenth Congress, First Session by Mocktime Publication

In October 1993 the US Congress terminated the Superconducting Super Collider at the time the largest basic-science project ever attempted, with a total cost estimated to exceed \$10 billion. Its termination was a watershed event a pivot point not only in the history of physics but also for science in general. "Tunnel Visions" follows the evolution of the endeavor from its origins in the Reagan Administration s military buildup of the early 1980s to its post-Cold War demise a decade later. The failure of the SSC raises the question of whether Big Science has become too big and expensive; can scientists and their government backers effectively manage such enormous undertakings? The case of the Super Collider offers important lessons about the conditions required to build and sustain a large scientific laboratory, and the rise and fall of the SSC also serves as a cautionary tale about the long-term viability of a research community that comes to depend as much as did US high-energy physics upon a single experimental facility of such an unprecedented scale. Riordan, Hoddson, and Kolb have written the definitive history of the SSC. "
